## Window Well Product Breakdown

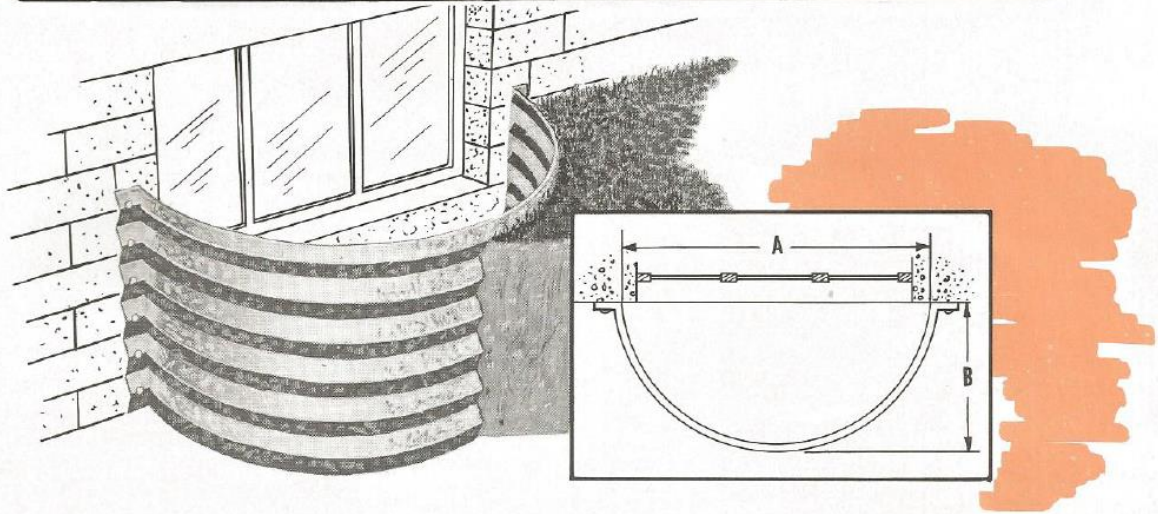

---

### Galvanized Steel Window Wells & Cover

Product Purpose – Vestal window wells are used to backfill around and protect basement/foundation windows or vents from dirt, debris or weather.

Made in the U.S.A.

# Galvanized Steel WINDOW WELLS

Vestal Window Wells provide light, ventilation and positive protection to basement windows located below ground level. Simply set in place and fasten to masonry foundation with masonry nails. Eliminates costly concrete forming.

Vestal Window Wells are made from prime quality, tight-coated, galvanized steel. The gleaming galvanized coating reflects light into the basement and provides lifetime protection from rust . . . eliminates need for paint.

Offered in both the round and flat type, with an inside clear span designed to fit any normal requirement. Full turned top flange and deep corrugations give added strength and safety. Wide mounting flanges with holes closely punched for easy installation.

Every operation in manufacturing is closely controlled and inspected. Every Vestal Window Well is the same uniformly high quality.

## Round Window Well – Galvanized Steel

Model No.	Inside Width	Projection	Height	Standard Package		Part Code
				Quantity	Wt. Lbs.	
R18-12	37"	16"	12"	4	30	90-006
