

## Grow Your Own Seeds

1. Plant your seeds into a pot. Do not crowd the seeds together.

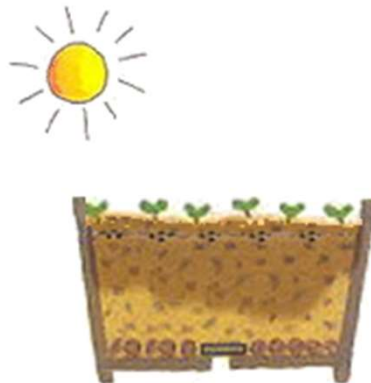

2. Cover the seeds with a thin layer of potting mixture.

3. Spray the seeds with water for 20 times.

4. Keep your seeds warm and moisturized. Avoid direct sunshine.

5. Maintain a temperature of 70-80 F and 2 hour sunshine daily.

6. And... you are done!  
Enjoy your own pot of green!
