

92883 AEON CUV Wet-Dry Interceptor Accessory Kit

The 92883 wet-dry interceptor utility vacuum accessory kit can be utilized with most major brands of utility vacuums. The 92883 is ideal for both wet and dry pick-up. The system retrieves dry or damp debris which you would prefer to not carry back into the vacuum bag for collection. It is not suitable for conveying refined pete-chemical products like gasoline, kerosene, or motor oils as this will degrade the hose.
