

***Gutter Protection 6” Clean Mesh - 4’ Panel
Keep gutter systems free flowing***

**SEMCO Item # 99451 GP 6K Clean Mesh AL 26 4’ White 40/40
99452 GP 6K Clean Mesh AL 26 4’ Brown 40/40**

Description: Clean Mesh is effective gutter protection from pine needles, seed pods and shingle grit and the only product of its type with a convex Screen design to readily shed debris. The product is also engineered with a rain siphoning vortex louver System and stainless steel micro mesh. The unique combination draws rainwater in while preventing debris from entering.

Installation: Installs at a slight angle to help debris roll off by wind or rain.

Clean-Mesh panel fits over the top lip of the gutter and secure in place using gutter screws, 1” from each end and middle. Optional screws may be utilized into the fascia to provide additional structural support for the entire gutter system.

Cut panel with snips to conform to mitered angles and butt tight together.
Bend the 2” section downward at a 90 degree angle to create an end cap.

Features: Eliminates leaves and debris from Clogging Gutters!

- Offset siphoning louver system handles the heaviest rain.
- Works with super gutters, box gutters and 6” K style gutters.
- Works for screen enclosures and pool cages.
- Alignment stiffening ribs for easy installation and added strength.
- Ideal for any type of roofing, including, shingles, slate, steel or tile.
- Fascia mount application and can also support the gutter

Material: This product is made from aluminum which is durable and corrosion resistant and also has an industrial paint system that preserves the finish.

- Available in 4’ length for 6” Gutters
- 25 pieces (100’ per carton.)
