

Toilet Seat Size Guide

Most toilets in North America come in two sizes:

- Round
- Elongated

Use the simple measurement guide below to determine what size toilet seat you'll need for your toilet.

Measure from: the *middle* of the holes in the toilet bowl

Measure to: the front rim of the toilet bowl.

If your bowl measures:

18.5" - You'll want to get an "Elongated" toilet seat.

16.5" - You'll want a "Round" toilet seat.

The terms "round" and "elongated" are plumbing industry standard terms and are not necessarily describing the aesthetic style of the seat or bowl.
