

# MICRO COIL CLEANER

## Overview:

Cooling coils trap dirt, airborne pollen and other troublesome contaminants that interfere with the proper operation of HVAC/R systems. This buildup also supports the growth of harmful bacteria and fungi. When used as directed, Micro Coil Cleaner safely removes accumulated buildup, restores operating efficiency and prepares the units for control of harmful organisms. Micro Coil Cleaner effectively cleans and deodorizes evaporator coils, condenser coils, heating coils, window units, air filters, blowers and other dirty HVAC/R components. This aerosol package is especially suited to cleaning ductless mini-splits, PTACs and window units. Coils should be cleaned regularly as part of a preventative maintenance program to maintain systems at peak operating efficiency.

- Cleans and deodorizes coils, drain pans, blowers and air-conditioning components
- Contains special detergents for safe preventative maintenance use, without harsh acids or caustics
- Will not damage metal by etching, pitting or corroding
- Will not burn skin or stain or bleach materials
- Safe disposal, no toxic run-off

## DIRECTIONS FOR USE:

1. Shut system off and spray on coils so as to get uniform coverage and maximum penetration
2. Wait 3 to 5 minutes and rinse with tap water
