Find the centerline of the track. Using a level, mark a horizontal line twice the door width long. Mark the bracket screw locations into the wall blocking. Attach the wall portion of the brackets as shown.

NOTES

To obtain maximum weight capacity, all fasteners must be mounted into solid wood studs or wall blocking or mounted to a header board.

Consult a structural engineer if you have questions about what type of wall blocking is required.

Wall Blocking

drill out
Ø10

4 (X4)
Drill out holes in the doors using a 10mm routing drill bit as pictured.

Attach the anti-jump disks to the tops of the doors.

5

1

2
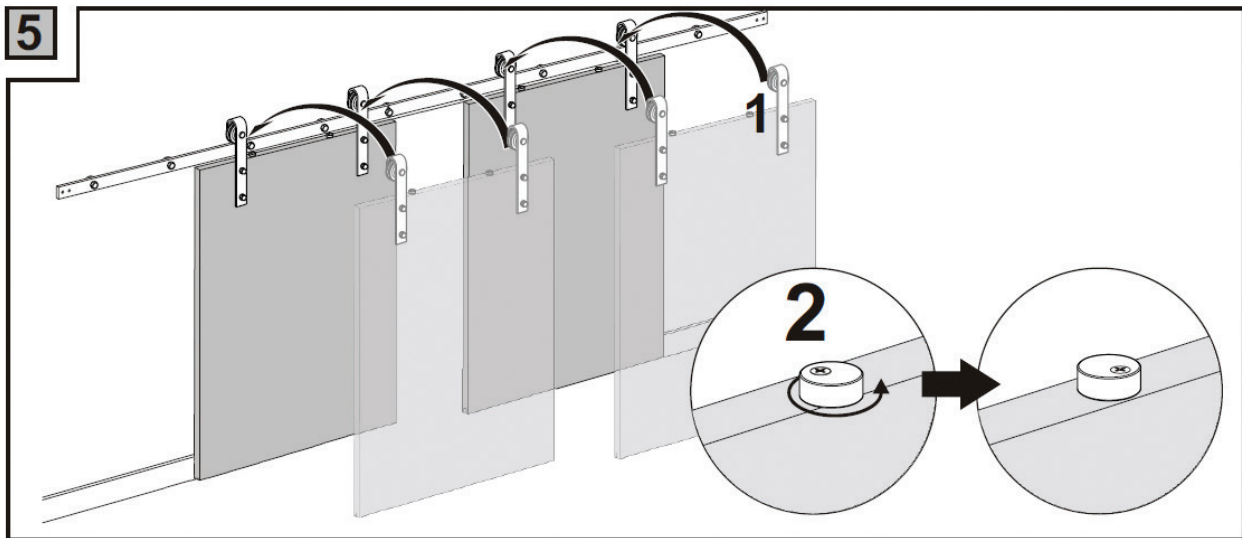

Attach the doors to the rails making sure that the anti-jump disks are engaged to avoid a serious accident.

6
Plumb the doors and mark the positions of the floor guides. Mount the floor guides to the floor.

7

(X4)
Adjust the door stops accordingly.

8

Install the end cap covers.
