**TECHNICAL DATA SHEET**

**INTERIOR EGGSHELL ENAMEL PAINT**

**NO. 2750 ULTRA PURE WHITE®**

**PRODUCT INFORMATION**

BEHR ULTRA™ Interior Eggshell Enamel Paint is a 100% acrylic paint & primer in one with advanced stain-blocking formula that will change the way you paint. This product, featuring NANO GUARD® Technology, forms an extra-protective shell with an easy-to-clean STAYS LOOKING NEW LONGER® Finish for excellent durability. It provides stain and scuff resistance, easy stain removal, antimicrobial-mildew resistance, and hides in fewer coats.

**RECOMMENDED USES FOR INTERIOR PAINTS:**

Use on properly prepared, coated and uncoated, interior surfaces such as:

- Drywall/Gypsum Board
- Concrete Masonry Units
- Concrete
- Wood
- Engineered Wood
- Other Ferrous Metals
- Other Non-Ferrous Metals
- Steel
- Galvanized Steel
- Masonry
- Brick
- Architectural Plastics

**PRODUCT SPECIFICATIONS:**

- **Tint Bases/Max Tint Load:**
  - No. 2750 Ultra Pure White 128 fl oz / 2 fl oz
  - No. 2754 Medium Base 120 fl oz / 10 fl oz
  - No. 2753 Deep Base 116 fl oz / 14 fl oz
- **Gloss:** 7-12 @ 60°
- **Sheen:** 17-22 @ 85°
- **Resin Type:** 100% Acrylic
- **Weight per Gallon:** 11.1 lb
- **% Solids by Volume:** 41 ± 2%
- **% Solids by Weight:** 55 ± 2%
- **VOC:** <50 g/L
- **Flash Point:** N/A
- **Viscosity:** 95-105 KU
- **Recommended Film Thickness:**
  - Wet: 6.4 mls / Dry: 2.6 mls @ 250 sq ft/gal
  - Wet: 4.0 mls / Dry: 1.6 mls @ 400 sq ft/gal
- **Coverage:** 250-400 sq ft/gal depending on application method and substrate porosity. Does not include the loss of material from spraying.

**APPLICATION:**

- **Brush:** Nylon/polyester
- **Roller:** 3/8” - 1/2” nap roller cover, depending on surface texture
- **Airless Spray:**
  - **Tip:** .015” - .019”
  - **Filter:** 60 mesh
  - **Fluid Pressure:** 1,400 - 2,400 psi
- **Thinning:** Do not thin if using a roller or brush; however, if using a sprayer and thinning is required, thin with water at a rate of no more than 1/2 pint per gallon.

**Dry Time:**

- @ 77°F & 50% RH
  - To Touch: 1 hour
  - To Recoat: 2 hours
  - Full Cure: 4 weeks

**Dry times are temperature, humidity, and film thickness dependent.**

**SURFACE PREPARATION:**

All surfaces must be clean, free of dust, chalk, oil, grease, wax, polish, mold and mildew stains, loose and peeling paint, rust and all other foreign substances.

**New Drywall:** All drywall surfaces should be sufficiently sanded smooth. Remove any remaining drywall dust prior to priming. Allow all drywall compounds to be completely dry prior to coating.

**New Wood:**
- Remove mill glaze with sandpaper or use a product such as BEHR PREMIUM® All-In-One Wood Cleaner No. 63 to open the pores of the wood and follow all label instructions. For severe stains caused by mold, mildew, algae and fungus, apply a mildew stain removing product. Set nails and fill holes, scratches, and gouges with the appropriate wood filler and let dry completely. Patched and filled surfaces should be sanded smooth and dusted clean prior to coating.
- New Masonry: The pH must be 10 or lower prior to coating. Smooth masonry may require an adequate profile for adhesion. For all other smooth trowel concrete, create an adequate profile for adhesion using a product such as muratic acid etcher or with mechanical means. Remove all loose aggregate and debris. Prime the area with an alkali-resistant primer.
- New Masonry: The pH must be 10 or lower prior to coating. Smooth masonry may require an adequate profile for adhesion. For all other smooth trowel concrete, create an adequate profile for adhesion using a product such as muratic acid etcher or with mechanical means. Remove all loose aggregate and debris. Prime the area with an alkali-resistant primer.
- New Wood: Remove mill glaze with sandpaper or use a product such as BEHR PREMIUM® All-In-One Wood Cleaner No. 63 to open the pores of the wood and follow all label instructions. For severe stains caused by mold, mildew, algae and fungus, apply a mildew stain removing product. Set nails and fill holes, scratches, and gouges with the appropriate wood filler and let dry completely. Remove all dust with a wiping cloth. Fill all gaps with a 100% acrylic, siliconized, paintable caulking and allow to dry completely. Patched and filled surfaces should be sanded smooth and dusted clean prior to coating.
- New Masonry: The pH must be 10 or lower prior to coating. Smooth masonry may require an adequate profile for adhesion. For all other smooth trowel concrete, create an adequate profile for adhesion using a product such as muratic acid etcher or with mechanical means. Remove all loose aggregate and debris. Prime the area with an alkali-resistant primer.
- New Plastic: New plastic should be thoroughly dried out and cured for a minimum of 30 days before painting. When cured, clean using a mixed solution of one part vinegar and one part water to remove efflorescence and neutralize. Prime the area with an alkali-resistant primer.

**STAIN-BLOCKING:**

After priming, test for stain bleed-through by applying the topcoat to a small section. If the stain bleeds through the topcoat, apply a second coat of primer and test again before topcoating the entire area. If bleeding continues, primer may need a longer dry time before applying topcoat.

Previously Painted Surfaces: Remove all loose and peeling paint and all other foreign substances. Clean any dirt and grease by scrubbing the surface with a detergent and water solution, followed by a thorough rinsing with clean water. Set nails and fill holes, scratches, and gouges with the appropriate wood filler and let dry completely. Remove all dust with a tack or wiping cloth. Fill all gaps with a 100% acrylic, siliconized, paintable caulk, and allow to completely dry prior to coating.

Glossy Surfaces: For maximum adhesion, sand the surface thoroughly to provide a rough surface before coating.

WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log onto www.epa.gov/lead.

Stain-Blocking:

- Self-prime using 2 coats of BEHR ULTRA Interior Paint or
- 1 coat BEHR® Drywall Plus Interior Primer & Sealer No. 73
- 2 coats BEHR ULTRA Interior Paint

Ferrous and Non-Ferrous Metals:

- 1 coat BEHR Interior/Exterior Metal Primer No. 435 (recommended for optimal corrosion resistance or when priming over sound rusty metal surfaces) or BEHR Multi-Surface Interior/Exterior Stain-Blocking Primer & Sealer No. 436
- 2 coats BEHR ULTRA Interior Paint

Glossy Surfaces:

- Self-prime using 2 coats of BEHR ULTRA Interior Paint or
- 1 coat BEHR Kitchen, Bath & Trim Interior Stain-Blocking Primer & Sealer No. 75 or BEHR Multi-Surface Interior/Exterior Stain-Blocking Primer & Sealer No. 436
- 2 coats BEHR ULTRA Interior Paint

Performance Data:

Scrubability
ASTM D2486 Scrub > 2000 (no shim)

Flexibility
ASTM D522, method B - Pass

Clean-up/Disposal:

Clean all tools and equipment with warm, soapy water. Do not dispose of this product down a drain. If spilled, contain material and remove with an inert absorbent. Dispose of contaminated absorbent, container and unused product in accordance with all current federal, state and local regulations. For recycling or disposal of empty containers, unused product and soiled rags, contact your household refuse collection service.

CAUTIONS/LIMITATIONS:

- Protect from freezing.
- Do not use on floors.
- For best results, apply when air, material and surface temperatures are between 50°F and 90°F. Temperatures above 90°F can cause the paint to dry too fast, whereas temperatures below 50°F can inhibit proper film formation.
- Allow 4 weeks before washing or cleaning for full cure.
- Shelf life under normal conditions is 2 years unopened.

General Information:

CAUTION IRRITANT MAY CAUSE EYE, NOSE AND THROAT IRRITATION. AVOID CONTACT WITH SKIN AND EYES AND AVOID BREATHING OF VAPORS AND SPRAY MIST. WEAR EYE PROTECTION AND PROTECTIVE CLOTHING. USE ONLY WITH ADEQUATE VENTILATION. To avoid breathing vapors and spray mist, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches or dizziness, increase fresh air. If properly used, a respirator (NIOSH approved for organic vapor with P series particulate pre-filter) may offer additional protection; obtain professional advice before using. A dust mask does not provide protection against vapors. Avoid contact with eyes and skin. Wash thoroughly after handling. Close container after each use.

FIRST AID: If you experience difficulty in breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical assistance immediately. In case of eye contact, flush immediately with plenty of water for at least 20 minutes and get medical attention; for skin, wash thoroughly with soap and water. If swallowed, get medical attention immediately.

CAUTION: KEEP OUT OF REACH OF CHILDREN – DO NOT TAKE INTERNALLY.
