

What can you do with your Onelink Safe & Sound?

Amazon Alexa

You can talk to Alexa on your Onelink Safe & Sound. With Alexa, you can ask to play music, hear the news, check weather, control smart home devices, and more.

Entertainment

"Alexa, play dinner party music."
"Alexa, play a game."

News and Information

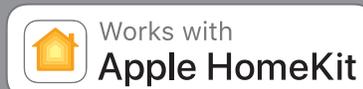

"Alexa, what action movies are playing this weekend?"
"Alexa, how's my commute?"

Around the House

"Alexa, give me a recipe for chicken pot pie."
"Alexa, reorder coffee."

HomeKit

HomeKit is a software framework by Apple that lets users set up their iPhone or other Apple device to configure, communicate with, and control smart-home appliances.

- Set scenes and triggers with your Apple HomeKit accessories.
- Will have AirPlay 2 as that becomes available.
- Use the Apple Home app to control your HomeKit accessories, including the Onelink Safe & Sound.

Intelligent Protection

Designed to help protect your home and family.

- Notifies your phone if there is a smoke or CO emergency in your home.
- Allows you to test and silence nuisance alarms through your phone if you are in your home.
- Voice and Location - alerts you to the danger (smoke or CO) and its location through a voice call out.

Custom Night Light

Select the color tone and brightness of your Safe & Sound's night light.
