

## Multi-Kill™ Electronic Mouse Trap Instructions

1. Remove battery cover. Unwrap and insert the 4 “C” batteries provided. Replace the battery cover.
2. Open the top of the Multi-Kill Electronic Mouse Trap.
3. Bait the trap using the bait trough provided. The bait trough is located on the back wall of the trap. Apply a small amount of peanut butter or anything high in protein like chocolate, hazelnut spread, etc. Be sure to use a Q-tip, toothpick or another tool to bait so your scent is not transferred onto the trap. Close the lid on the electronic mouse trap.
4. Place the trap where you have seen signs of rodent activity or along the wall where rodents primarily travel. The trap should be placed lengthwise against the wall with the entrance hole nearest the wall.
5. Turn on the trap – a green light will blink once showing the trap is working properly.
6. A blinking green light will indicate a kill. Dispose of the dead rodent, bait, place and reset for continued rodent control.
