

Easy-Hook Earth Anchors (4 Pcs.)

10036

Please Read Instructions Completely Before Installation

Installing Earth Grabber Anchors

Using the provided steel driving rod and a sledge hammer (an electric rotary hammer may also be used) drive each anchor into the ground leaving approximately 8 inches of cable exposed above the surface. The anchors should be located at the four corners and the remaining should be spaced evenly on both sides. Remove the driving rod; insert it through the loop in the cable and pull up on the cable to set the anchor. After the anchors are firmly set, wrap the cable around the cover rail and clamp with the provided clamps. Be sure to take all the slack from the cable.
