

Let's get started!

Smart WiFi
Ceramic Tower Heater

Quick Start Guide

Get the app

Download the atomi smart app from the App Store or Google Play.

Register

Follow the on-screen instructions and register an account.

Add your smart device

Press "Add Device" or the "+" sign and choose the smart device to install from the device list.

Select the right network

Enter your WiFi password and "Confirm".

Make sure you're connected to a 2.4GHz WiFi network (atomi Smart can't connect to 5GHz networks).

Plug in your smart device

And press "Continue" on the atomi smart app.

Connect to the network

Press "Go to Connect" and follow the instructions on the screen.

Connect your smart device

Select "atomi-smart-XXXX" on the network list to connect.

If you are not automatically directed to the WiFi list, go to SETTINGS on your smartphone and press WiFi.

Troubleshooting

Smart WiFi Ceramic Tower Heater

I can't find the atomi.smart.XXXX network in my WiFi list.

Make sure your atomi smart device is plugged in and the WiFi light is blinking quickly. If not, unplug your atomi smart device and plug it back in to reboot.

My WiFi network doesn't appear in the atomi smart app.

Use your smartphone to confirm that you have at least two WiFi bars in the vicinity of your atomi smart device. If not, move your atomi smart device closer to your router. (The list will refresh every 10 seconds).

Cannot connect to my WiFi network.

Make sure that you have entered the correct WiFi password during the WiFi setup. Check if there are problems with your internet connection. If the WiFi signal is too weak, reset your WiFi router and try again.

My atomi smart device appears as "Unavailable" in the app.

Refresh the device list.

My atomi smart app is frozen.

Force quit and re-launch the atomi smart app.

I just replaced my router.

To reset the WiFi without losing your atomi smart devices settings, hold down the power button and wait for the LED to change from amber to blinking white, then release. When the LED begins to alternate white and amber, follow steps 3-5 to associate your atomi smart device with your new network.

I'm still having trouble!

WiFi networks come in a lot of shapes and sizes with many quirks of their own. It doesn't mean your atomi smart device is malfunctioning. If problems persist, please try these steps, in this order:

1. Force quit and re-launch the atomi smart app. Check to see if this fixes the issue.
2. Unplug your atomi smart device and plug it back in. Check to see if this fixes the issue.
3. Unplug your router and plug it back in. Check to see if this fixes the issue.
4. Delete and reinstall the atomi smart app. Check to see if this fixes the issue.
