WARNING

DO NOT USE ELECTRIC CHECKER. USE MAGNETIC CHECKERS.

TURN POWER OFF BEFORE INSTALLING - SEE INSTRUCTIONS.

DO NOT INSTALL IN軟 INDOOR OR OUTDOOR LOCATIONS.

DO NOT INSTALL IN VENTILATION SUMP PUMPS, WASHING MACHINES, OR TUBS.

DO NOT INSTALL IN THE UNIT WITH A MISaligned OR DAMAGED LENS.

How It Works:
The heater substituted, the damper mechanism or the temperature sensor?

The damper mechanism is moved by the lever arm of the intake air. The sensor is located on the inside of the intake air and is used to monitor the temperature of the incoming air.
