1508 Ash Container

This ash container and shovel is ideal for any hearth setting. Don't risk spreading ashes on your floors. Since this container is steel, it can handle warm ashes that will melt plastic bags and trash cans. Perfect for large cleanup jobs.

ASH REMOVAL AND DISPOSAL

Whenever ashes get 3 to 4 inches deep in your firebox or ash pan, and when the fire has burned down and cooled, remove excess ashes. Leave an ash bed approximately 1 inch deep on the firebox bottom to help maintain a hot charcoal bed.

Ashes should be placed in a metal container with a tight-fitting lid. The closed container of ashes should be placed on a noncombustible floor or on the ground, away from all combustible materials, pending final disposal. The ashes should be retained in the closed container until all cinders have thoroughly cooled.

- Safe removal and storage of ashes
- Stores kindling, pellets, charcoal or paper
- Tight fitting lid with lift handle
- Comfortable wooden grip carrying handle
- Satin black finish with brass trim
- Six gallon capacity
- A must have accessory for every wood, coal, pellet or corn burning stove
- Handy "pocket" holds shovel securely in place

WARNING:

Allow the stove to cool before carrying out any maintenance or cleaning.
