

**LOCTITE**<sup>®</sup>

# CONSTRUCTION ADHESIVES

*Bonds Together Medium to Large Surfaces in Household DIY Projects, both Indoor and Outdoor*

## **POWER GRAB**<sup>®</sup>

*Bonds virtually all materials to any porous surface.*

## **PL PREMIUM**<sup>®</sup>

*Bonds virtually all materials, especially good for bonding materials that are non-porous.*

## **PREPARATION**

*Clean and dry surfaces, ensure they are free from grease, dust, oil, wax and paint. Lightly roughen up or sand the surfaces to be bonded. Remember to protect the work surface.*

*Temperature of adhesive and surfaces to be bonded must be above 50°F for these latex formulas.*

*Temperature of adhesive and surfaces to be bonded must be above 40°F for polyurethane formula.*

## **APPLICATION**

*Apply around the perimeter, then in an s-shape on the interior. Repositionable up to 15 minutes.*

## **REMOVAL FROM SKIN, FABRIC & SURFACES**

*Immediately clean tools and sealant residue before curing. Cured sealant may be carefully cut away with a sharp-edged tool.*

*Use warm soapy water when cleaning. | Use mineral spirits when cleaning.*
