1. Securely attach the female end of the Soaker Hose to your existing garden hose. Ensure washer is in place to prevent leaks.

2. Place Soaker Hose around the base of plants you want to water.

3. End cap should remain attached; only remove to connect an additional hose.

Warning: Designed for outdoor use only. Do not use indoor or in areas where the ambient air temperature dips below 40°F (4°C). Do not allow to freeze if not in use. Drain excess water in freezing temperatures.

Attention: For usage in Bermuda only. Brake in extreme weather may cause water to be ejected from hose. Do not store in extreme heat. Do not use indoors. Do not store in direct sunlight. Do not expose to extreme cold temperatures. Do not use in freezing conditions. Do not expose to extreme heat temperatures. Do not expose to extreme cold temperatures.
