1. PRODUCT AND COMPANY IDENTIFICATION

**Product Name**
Valve Regulated Maintenance Free Lead-Acid Batteries: DJW, DJM, DJ, FT, LP, LPC, LPL, LPF, LPX, LPS, XP, XPE, XVP, PLH, PLC, PLX Series

**Recommended Use**
Lead acid battery. Lead Acid (Non-spillable) Battery

**Supplier Address**
Leoch Battery Corp
19751 Descartes
Unit A
Foothill Ranch, CA 92610
Phone: 800-424-9300
Fax: 949-588-5966
Contact: Paul Yu
Email: paulyu@leoch.us
Contact Phone: 949-588-5853

NOTE: Leoch Battery is considered an article as defined by 29 CFR 1910.1200 (OSHA Hazard Communication Standard).
The information supplied in this SDS is at the customer’s request for information only.

**Emergency Contact Number:** 1-800-424-9300 CHEMTREC US & MEX
1-703-527-3887 CHEMTREC International

2. HAZARDS IDENTIFICATION

**Emergency Overview**
NOTE: Under normal conditions of battery use, internal components will not present a health hazard. The following information is provided for battery acid and lead exposure that may occur during battery production or container breakage or under extreme heat conditions such as fire. In case of rupture, Corrosive The product causes burns of eyes, skin and mucous membranes

**Appearance:** No information available.

**Physical State:** Solid.

**Odor:** Odorless

**Potential Health Effects**

**Principle Routes of Exposure**
Skin contact.

**Acute Toxicity**
Oral, dermal, inhalation: Category 4

**Eyes**
Corrosive to the eyes and may cause severe damage including blindness. Category 1

**Skin**
Causes burns, corrosion, irritation. Category 1A

**Inhalation**
Harmful by inhalation. Contact with moist mucous membranes of the respiratory system can cause caustic condition resulting in burns. Category 4

**Ingestion**
Harmful if swallowed. Can burn mouth, throat, and the rest of digestive tract. Category 4

**Reproductive**
Category 1A

**Carcinogenicity**
Category 1B

**Chronic Effects**
Lead compounds may be absorbed by ingestion, by inhalation and through the skin. Lead may damage kidney function, the blood forming system and the reproductive system. Avoid repeated exposure. Severe exposures can lead to shock, circulatory collapse, and death. Lead poisoning is characterized by a metallic taste in the mouth, loss of appetite
indigestion, nausea, vomiting, constipation, sleep disturbances and overall weakness

**Aggravated Medical Conditions**
None known.

**Environment Hazard**
Toxic to aquatic life with long lasting effects. Aquatic Chronic 1, Aquatic Acute 1

**Label Elements:**

<table>
<thead>
<tr>
<th>Health</th>
<th>Environmental</th>
<th>Physical</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Health Hazard" /></td>
<td><img src="image" alt="Environmental Hazard" /></td>
<td><img src="image" alt="Physical Hazard" /></td>
</tr>
</tbody>
</table>

**Hazard Statements**

**DANGER!**
Causes severe skin damage
Causes serious eye damage.
May damage fertility or the unborn child if ingested or inhaled.
May cause cancer if ingested or inhaled.
Causes damage to central nervous system, blood and kidneys through prolonged or repeated exposure.

**Precautionary Statements**

Wash thoroughly after handling.
Do not eat, drink or smoke when using this product.
Wear protective gloves/protective clothing, eye protection/face protection.
Avoid breathing dust/fume/gas/mist/vapors/spray.
Use only outdoors or in a well-ventilated area.
Causes skin irritation, serious eye damage.
Contact with internal components may cause irritation or severe burns. Avoid contact with internal acid.
Irritating to eyes, respiratory system, and skin.

### 3. COMPOSITION/INFORMATION ON INGREDIENTS

<table>
<thead>

<td>7440-31-5</td>
<td>&lt;0.5</td>
</tr>
<tr>
<td>Calcium</td>
<td>7440-70-2</td>
<td>&lt;0.1</td>
</tr>
</tbody>
</table>

### 4. FIRST AID MEASURES

**General Advice**
First aid is upon rupture of sealed battery.

**Eye Contact**
Immediate medical attention is required. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Keep eye wide open while rinsing. Do not rub affected area.

**Skin Contact**
Immediate medical attention is required. Wash off immediately with soap and plenty of water removing all contaminated clothes and shoes.
**Inhalation**
Move to fresh air. Call a physician or Poison Control Center immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.

**Ingestion**
Immediate medical attention is required. Call a physician or Poison Control Center immediately. Do NOT induce vomiting. Drink plenty of water. Never give anything by mouth to an unconscious person. Remove from exposure, lie down.

**Notes to Physician**
Treat symptomatically.

**Protection of First-aiders**
Use personal protective equipment. Avoid contact with skin, eyes and clothing.

---

### 5. FIRE-FIGHTING MEASURES

<table>
<thead>
<tr>
<th>Flammable Properties</th>
<th>Not flammable.</th>

<tr>
<td>Hazardous Combustion Products</td>
<td>Hazardous metal fumes and oxides.</td>
</tr>
<tr>
<td>Explosion Data Sensitivity to Mechanical Impact</td>
<td>No.</td>
</tr>
<tr>
<td>Sensitivity to Static Discharge</td>
<td>No.</td>
</tr>
</tbody>
</table>

**Specific Hazards Arising from the Chemical**
The product causes burns of eyes, skin and mucous membranes. Thermal decomposition can lead to release of irritating gases and vapors. In the event of fire and/or explosion do not breathe fumes.

**Protective Equipment and Precautions for Firefighters**
As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

---

### 6. ACCIDENTAL RELEASE MEASURES

**Personal Precautions**
Use personal protective equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Do not get in eyes, on skin, or on clothing.

**Environmental Precautions**
Refer to protective measures listed in Sections 7 and 8.

**Methods for Containment**
Prevent further leakage or spillage if safe to do so.

**Methods for Cleaning Up**
In case of rupture: Use personal protective equipment. Dam up. Soak up with inert absorbent material. Take up mechanically and collect in suitable container for disposal. Clean contaminated surface thoroughly.

**Other Information**
Refer to protective measures listed in Sections 7 and 8.

---

### 7. HANDLING AND STORAGE
Handling
Handle in accordance with good industrial hygiene and safety practice.

Storage
Keep containers tightly closed in a dry, cool and well-ventilated place.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Guidelines

<table>
<thead>
<tr>
<th>Chemical Name</th>
<th>ACGIH TLV</th>
<th>OSHA PEL</th>
<th>NIOSH IDLH</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lead 7439-92-1</td>

</tr>
</tbody>
</table>

ACGIH TLV: American Conference of Governmental Industrial Hygienists - Threshold Limit Value.
OSHA PEL: Occupational Safety and Health Administration - Permissible Exposure Limits.
NIOSH IDLH: Immediately Dangerous to Life or Health.

Other Exposure Guidelines
Vacated limits revoked by the Court of Appeals decision in AFL-CIO v. OSHA, 965 F.2d 962 (11th Cir., 1992).

Engineering Measures
Showers
Eyewash stations
Ventilation systems

Personal Protective Equipment

Eye/Face Protection
Tightly fitting safety goggles.

Skin and Body Protection
Wear protective gloves/clothing.

Respiratory Protection
No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required.

Hygiene Measures
Handle in accordance with good industrial hygiene and safety practice.

10. STABILITY AND REACTIVITY
Stability
Stable under recommended storage conditions.

Incompatible Products
Incompatible with strong acids and bases. Incompatible with oxidizing agents.

Conditions to Avoid
Exposure to air or moisture over prolonged periods.

Hazardous Decomposition Products
Thermal decomposition can lead to release of toxic/corrosive gases and vapors

Hazardous Polymerization
Hazardous polymerization does not occur.

## 11. TOXICOLOGICAL INFORMATION

### Acute Toxicity

**Product Information**
Product does not present an acute toxicity hazard based on known or supplied information.

**Irritation**
Causes severe irritation and or burns

### Component Information

<table>
<thead>
<tr>
<th>Chemical Name</th>

**ACGIH:** (American Conference of Governmental Industrial Hygienists)
A2 - Suspected Human Carcinogen  
A3 - Animal Carcinogen  

**IARC:** (International Agency for Research on Cancer)  
Group 1 - Carcinogenic to Humans  
Group 2A - Probably Carcinogenic to Humans  

**NTP:** (National Toxicity Program)  
Known - Known Carcinogen  
Reasonably Anticipated - Reasonably Anticipated to be a Human Carcinogen  

**OSHA:** (Occupational Safety & Health Administration)  
X - Present  

### Reproductive Toxicity
Product is or contains a chemical which is a known or suspected reproductive hazard.

### Developmental Toxicity
Contains ingredients that have suspected developmental hazards. Inorganic lead compounds can cause developmental damage.
Target Organ Effects

None known.

12. ECOLOGICAL INFORMATION

Ecotoxicity

The environmental impact of this product has not been fully investigated.

14. TRANSPORT INFORMATION
Note: Transportation requirements do not apply once the battery pack has been installed in an equipment as part of the equipment’s functional components.

Transportation: Absorptive Glass-Fiber Material Lead Acid Battery is not a DOT Hazardous Material

Other: Per DOT, IATA, ICAO, and IMDG rules and regulations, these batteries are exempt from “UN2800” classification as a result of successful completion of the following tests:
1.) Vibration tests
2.) Pressure Differential Tests
3.) Case Rupturing Tests (no free liquids)

Note: Exempt from hazardous materials regulations per 49CFR173.159 (d).

| DOT Description | NOT REGULATED NON-SPILLABLE BATTERY |

**General Disclaimer**

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

End of Safety Data Sheet
# 1 Identification

- **Product identifier**
- **Trade name:** Li-MnO2 Button Cell
- **Article number:** CR2032
- **Application of the substance / the mixture** Lithium-based battery product.
- **Details of the supplier of the Safety Data Sheet**
  - **Manufacturer/Supplier:** Jintan Chaochuang Battery Company Limited
  - **Address:** Xiyang Industrial Estate, Maolu Town
  - **City:** Jintan City, Jiangsu Province, China
  - **Phone:** +86-519-82483588
  - **Fax:** +86-755-29369623
- **Emergency telephone number:** +86-519-82483588

# 2 Hazard(s) identification

- **Classification of the substance or mixture**
  - **GHS02 Flame**
  - Water-react. 3  H261 In contact with water releases flammable gas.
- **Additional information:**
  - There are no other hazards not otherwise classified that have been identified.
  - 0 percent of the mixture consists of ingredient(s) of unknown toxicity.
- **Label elements**
  - **GHS label elements**
    - The product is classified and labeled according to the Globally Harmonized System (GHS).
  - **Hazard pictograms**
    - **GHS02**
- **Signal word** Warning
- **Hazard-determining components of labeling:**
  - **lithium**
  - **Hazard statements**
    - H261 In contact with water releases flammable gas.
- **Precautionary statements**
  - **P280** Wear protective gloves and eye protection.
  - **P370+P378** In case of fire: Use for extinction: Fire-extinguishing powder.
  - **P402+P404** Store in a dry place. Store in a closed container.
  - **P501** Dispose of contents/container in accordance with local/regional/national/international regulations.
- **Additional information:**
  - Information references exposures to battery contents, and not exposures to whole units. Exposures to whole units are unlikely to produce health hazards.

(Contd. on page 2)
Trade name: Li-MnO2 Button Cell

- Hazard description:
- WHMIS-symbols:
  B6 - Reactive flammable material

- Classification system:
- NFPA ratings (scale 0 - 4)
  Health = 0
  Fire = 0
  Reactivity = 2

  The substance demonstrates unusual reactivity with water.

- HMIS-ratings (scale 0 - 4)
  Health = 0
  Fire = 0
  Reactivity = 2

- Other hazards
  - Results of PBT and vPvB assessment
  - PBT: Not applicable.
  - vPvB: Not applicable.

3 Composition/information on ingredients

- Chemical characterization: Mixtures
- Description: Mixture of the substances listed below with nonhazardous additions.

4 First-aid measures

- Description of first aid measures
- General information:
  Information references exposures to battery contents, and not exposures to whole units. Exposures to whole units are unlikely to produce health hazards.
  Immediately remove any clothing soiled by the product.
  Take affected persons out into the fresh air.
- After inhalation:
  Unlikely route of exposure.
  Supply fresh air; consult doctor in case of complaints.
- After skin contact:
  Unlikely route of exposure.
  Immediately rinse with water.
  If skin irritation continues, consult a doctor.
  Seek immediate medical help for blistering or open wounds.
- After eye contact:
  Unlikely route of exposure.
  Protect unharmed eye.
  Remove contact lenses if worn.
  Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.
- After swallowing: Do not induce vomiting; immediately call for medical help.

- Information for doctor:
  - Most important symptoms and effects, both acute and delayed
    No further relevant information available.
  - Danger: Danger of gastric perforation.
  - Indication of any immediate medical attention and special treatment needed
    No further relevant information available.

5 Fire-fighting measures

- Extinguishing media
- Suitable extinguishing agents:
  Fire-extinguishing powder
  Sand
  Water in flooding quantities.
- For safety reasons unsuitable extinguishing agents: None.
- Special hazards arising from the substance or mixture
  Formation of toxic gases is possible during heating or in case of fire.
- Advice for firefighters
- Protective equipment:
  Wear self-contained respiratory protective device.
  Wear fully protective suit.
- Additional information
  Eliminate all ignition sources if safe to do so.

(Contd. on page 4)
6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures
  Ensure adequate ventilation.
  If containers are leaking, use respiratory protective device against the effects of fumes/dust/aerosol.
  Wear protective equipment. Keep unprotected persons away.
- Environmental precautions: Do not allow to enter sewers/ surface or ground water.
- Methods and material for containment and cleaning up:
  Use inert material (clay, sawdust, kaolin) to absorb material and sweep up. Prevent spilled material from entering sewers, drains, bodies of water.
  Pick up mechanically.
  Dispose contaminated material as waste according to item 13.
  Send for recovery or disposal in suitable receptacles.
- Reference to other sections
  See Section 7 for information on safe handling.
  See Section 8 for information on personal protection equipment.
  See Section 13 for disposal information.

7 Handling and storage

- Handling:
  - Precautions for safe handling
    Information is only applicable to product contents, and not to product as normally supplied. This information is applicable to damaged, leaking, or spilled product as contact with contents is possible under these conditions.
    Keep away from open flames or temperatures exceeding manufacturer ratings. DO NOT ATTEMPT TO OPEN SEALED CELLS OR BATTERIES – BATTERY CONTENTS MAY PRESENT SERIOUS SAFETY AND HEALTH HAZARDS. SHORT-CIRCUITING THE TERMINALS OF A DEVICE MAY RESULT IN DAMAGE TO DEVICE AND ANY NEARBY OBJECTS OR PERSONNEL.
    Information about protection against explosions and fires:
    Prevent impact and friction.
    Substance/product is ignitable under certain conditions.
  - Conditions for safe storage, including any incompatibilities
  - Storage:
    - Requirements to be met by storerooms and receptacles:
      Store in a dry, well-ventilated place.
      Do not use or store near open flame.
      Avoid extreme temperatures; battery may rupture and release contents.
      Do not store and transport with incompatible materials.
      Store individual batteries or cells only in approved packaging in order to avoid inadvertent short circuits, as this may result in damage to device, nearby objects, personnel, or all of the above.
    - Information about storage in one common storage facility:
      Store away from foodstuffs.
      Store away from water.
      Do not store together with acids.
Trade name: Li-MnO2 Button Cell

- Further information about storage conditions:
  Store in dry conditions.
  Protect from humidity and water.
- Specific end use(s) No further relevant information available.

### 8 Exposure controls/personal protection

- Additional information about design of technical systems: No further data; see item 7.
- Control parameters

Trade name: Li-MnO2 Button Cell

(Contd. of page 5)

- **Exposure controls**
- **Personal protective equipment:**
- **General protective and hygienic measures:**
  Information is only applicable to product contents, and not to product as normally supplied. This information is applicable to damaged, leaking, or spilled product as contact with contents is possible under these conditions.
  The usual precautionary measures for handling chemicals should be followed.
  Keep away from foodstuffs, beverages and feed.
  Immediately remove all soiled and contaminated clothing.
  Wash hands before breaks and at the end of work.
  Do not inhale gases / fumes / aerosols.
  Avoid contact with the eyes and skin.
- **Engineering controls:** No further relevant information available.
- **Breathing equipment:**
  Not required under normal conditions of use.
  For spills, respiratory protection may be advisable.
- **Protection of hands:**
  Not required under normal conditions of use.
  Wear protective gloves to handle contents of damaged or leaking units.
  The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
  Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
- **Material of gloves**
  The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
- **Penetration time of glove material**
  The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
- **Eye protection:**
  Safety glasses

- **Body protection:**
  Not required under normal conditions of use.
  Protection may be required for spills.
- **Limitation and supervision of exposure into the environment** Avoid release to the environment.

### Trade name: Li-MnO2 Button Cell

- **Odor:** Odorless
- **Odor threshold:** Not determined.
- **pH-value:** Not applicable.
- **Flash point:** Not applicable.
- **Flammability (solid, gaseous):** Not determined.
- **Auto-ignition temperature:** Not determined.
- **Decomposition temperature:** Not determined.
- **Auto igniting:** Product is not self-igniting.
- **Danger of explosion:** Product does not represent an explosion hazard during normal use. Leaking contents may react with water to produce explosive or flammable gas.
- **Explosion limits:**
  - **Lower:** Not determined.
  - **Upper:** Not determined.
- **Vapor pressure:** Not applicable.
- **Density:** Not determined.
- **Relative density:** Not determined.
- **Vapour density:** Not applicable.
- **Evaporation rate:** Not applicable.
- **Solubility in / Miscibility with Water:** Not miscible or difficult to mix.
- **Partition coefficient (n-octanol/water):** Not determined.
- **Viscosity:**
  - **Dynamic:** Not applicable.
  - **Kinematic:** Not applicable.
- **Other information** No further relevant information available.

## 10 Stability and reactivity

- **Reactivity**
- **Chemical stability**
- **Thermal decomposition / conditions to be avoided:** No decomposition if used and stored according to specifications.
- **Possibility of hazardous reactions**
  Hazardous reactions generally occur with contents of leaking batteries only.
  Strong exothermic reaction with acids.
  Toxic fumes may be released if heated above the decomposition point.
  Reacts violently with water.

(Contd. on page 8)
Trade name: Li-MnO2 Button Cell

Contact with water will cause spontaneous hydrolysis (Can be explosive!).

- **Conditions to avoid**: Keep away from heat and direct sunlight.
- **Incompatible materials**: Reducing agents, combustible materials, moisture, contact with metals.
- **Hazardous decomposition products**:
  - Carbon monoxide and carbon dioxide
  - Contact with decomposition products does not normally occur; information is applicable only to damaged devices.
  - Flammable gases/vapors
  - Toxic metal oxide smoke
  - Chlorine compounds

### 11 Toxicological information

- **Information on toxicological effects**
- **Acute toxicity**:

<table>

</tr>
</thead>
<tbody>
<tr>
<td>110-71-4 1,2-dimethoxyethane</td>
</tr>
<tr>
<td>Oral</td>
</tr>
</tbody>
</table>

- **Primary irritant effect**:
  - **on the skin**: Strong caustic effect in case of contact with electrolyte only.
  - **on the eye**: Strong caustic effect in case of contact with electrolyte only.
  - **Sensitization**: No sensitizing effects known.
- **Subacute to chronic toxicity**: No further relevant information available.

- **Additional toxicological information**:
  - Information references exposures to battery contents, and not exposures to whole units. Exposures to whole units are unlikely to produce health hazards.
  - Harmful if swallowed.
  - Harmful if inhaled.
  - Product is suspected to cause birth defects.
  - The product can cause inheritable damage.

- **Carcinogenic categories**

  - **NTP (National Toxicology Program)**: None of the ingredients is listed.

  - **OSHA-Ca (Occupational Safety & Health Administration)**: None of the ingredients is listed.

- **Probable Routes of Exposure**
  - Ingestion.
  - Skin contact.
- **Repeated Dose Toxicity**: May cause damage to organs through prolonged or repeated exposure.

### 12 Ecological information

- **Toxicity**
  - **Aquatic toxicity**: The product contains materials that are harmful to the environment.
  - **Persistence and degradability**: Not easily biodegradable

(Contd. of page 7)

(Contd. on page 9)
Trade name: Li-MnO2 Button Cell

- Behavior in environmental systems:
- Bioaccumulative potential: No further relevant information available.
- Mobility in soil: No further relevant information available.
- Additional ecological information:
  - General notes:
    This statement was deduced from the properties of the single components.
    Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.
  - Results of PBT and vPvB assessment
    - PBT: Not applicable.
    - vPvB: Not applicable.
  - Other adverse effects: No further relevant information available.

13 Disposal considerations

- Waste treatment methods
  - Recommendation:
    Must not be disposed of together with household garbage. Do not allow product to reach sewage system. Contact waste processors for recycling information.
    The user of this material has the responsibility to dispose of unused material, residues and containers in compliance with all relevant local, state and federal laws and regulations regarding treatment, storage and disposal for hazardous and nonhazardous wastes. Residual materials should be treated as hazardous.
  - Uncleaned packagings:
    - Recommendation: Disposal must be made according to official regulations.

14 Transport information

PRODUCT SAFETY DATA SHEET

PRODUCT NAME: Eveready / Energizer Battery

Type No.: 

Volts: 

TRADE NAMES: ENERGIZER, ENERGIZER e², INDUSTRIAL ZMA, HERCULES, EVEREADY, WONDER

Approximate Weight: 

CHEMICAL SYSTEM: Alkaline Manganese Dioxide-Zinc

Designed for Recharge: No

Energizer has prepared copyrighted Product Safety Datasheets to provide information on the different Eveready/Energizer battery systems. Batteries are articles as defined under the GHS and exempt from GHS classification criteria (Section 1.3.2.1.1 of the GHS). The information and recommendations set forth herein are made in good faith, for information only, and are believed to be accurate as of the date of preparation. However, ENERGIZER BATTERY MANUFACTURING, INC. MAKES NO WARRANTY, EITHER EXPRESS OR IMPLIED, WITH RESPECT TO THIS INFORMATION AND DISCLAIMS ALL LIABILITY FROM REFERENCE ON IT.

SECTION 1 - MANUFACTURER INFORMATION

Energizer Battery Manufacturing, Inc.
25225 Detroit Rd.
Westlake, OH 44145

Telephone Number for Information:
800-383-7323 (USA / CANADA)

Date Prepared: March 2015

SECTION 2 – HAZARDS IDENTIFICATION

GHS classification: N/A

Signal Word: N/A

Hazard Classification: N/A

Under normal conditions of use, the battery is hermetically sealed.

Ingestion: Swallowing a battery can be harmful. Contents of an open battery can cause serious chemical burns of mouth, esophagus, and gastrointestinal tract.

Inhalation: Contents of an open battery can cause respiratory irritation.

Skin Contact: Contents of an open battery can cause skin irritation and/or chemical burns.

Eye Contact: Contents of an open battery can cause severe irritation and chemical burns.

SECTION 3 - INGREDIENTS

IMPORTANT NOTE: The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful.

SECTION 4 – FIRST AID MEASURES

**Ingestion:** Do not induce vomiting or give food or drink. Seek medical attention immediately. CALL NATIONAL BATTERY INGESTION HOTLINE for advice and follow-up (202-625-3333) collect day or night.

**Inhalation:** Provide fresh air and seek medical attention.

**Skin Contact:** Remove contaminated clothing and wash skin with soap and water. If a chemical burn occurs or if irritation persists, seek medical attention.

**Eye Contact:** Immediately flush eyes thoroughly with water for at least 15 minutes, lifting upper and lower lids, until no evidence of the chemical remains. Seek medical attention.

SECTION 5 - FIRE FIGHTING MEASURES

In case of fire, it is permissible to use any class of extinguishing medium on these batteries or their packing material. Cool exterior of batteries if exposed to fire to prevent rupture. Fire fighters should wear self-contained breathing apparatus.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

To cleanup leaking batteries:

**Ventilation Requirements:** Room ventilation may be required in areas where there are open or leaking batteries.

**Eye Protection:** Wear safety glasses with side shields if handling an open or leaking battery.

**Gloves:** Use neoprene or natural rubber gloves if handling an open or leaking battery.

Battery materials should be collected in a leak-proof container.

SECTION 7 - HANDLING AND STORAGE

**Storage:** Store in a cool, well ventilated area. Elevated temperatures can result in shortened battery life.

**Mechanical Containment:** If potting or sealing the battery in an airtight or watertight container is required, consult your Energizer Battery Manufacturing, Inc. representative for precautionary suggestions. Batteries normally evolve hydrogen which, when combined with oxygen from the air, can produce a combustible or explosive mixture unless vented. If such a mixture is present, short circuits, high temperature, or static sparks can cause an ignition.

Do not obstruct safety release vents on batteries. Encapsulation (potting) of batteries will not allow cell venting and can cause high pressure rupture.

**Handling:** Accidental short circuit for a few seconds will not seriously affect the battery. Prolonged short circuit will cause the battery to lose energy, and can cause the safety release vent to open. Sources of short circuits include jumbled batteries in bulk containers, metal jewelry, metal covered tables or metal belts used for assembly of batteries into devices.

If soldering or welding to the battery is required, consult your Energizer Battery Manufacturing, Inc. representative for proper precautions to prevent seal damage or short circuit.

**Charging:** This battery is manufactured in a charged state. It is not designed for recharging. Recharging can cause battery leakage or, in some cases, high pressure rupture. Inadvertent charging can occur if a battery is installed backwards.

**Labeling:** If the Eveready / Energizer Battery label or package warnings are not visible, it is important to provide a package and/or device label stating:

**WARNING:** do not install backwards, charge, put in fire, or mix with other battery types. May explode or leak causing injury.

Replace all batteries at the same time.

Where accidental ingestion of small batteries is possible, the label should include:

Keep away from small children. If swallowed, promptly see doctor; have doctor phone (202) 625-3333 collect.
SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

Ventilation Requirements: Not necessary under normal conditions.

Respiratory Protection: Not necessary under normal conditions.

Eye Protection: Not necessary under normal conditions.

Gloves: Not necessary under normal conditions.

SECTION 10 – STABILITY AND REACTIVITY

Alkaline batteries do not meet any of the criteria established in 40 CFR 261.2 for reactivity.

©2015 Energizer
SECTION 11 – TOXICOLOGICAL INFORMATION

Under normal conditions of use, alkaline batteries are non-toxic.

SECTION 12 – ECOLOGICAL INFORMATION

Issues such as ecotoxicity, persistence and bioaccumulation are not applicable for articles.

SECTION 13 – DISPOSAL CONSIDERATIONS

Dispose of in accordance with all applicable federal, state and local regulations. Appropriate disposal technologies include incineration and land filling.

SECTION 14 – TRANSPORT INFORMATION

In general, all batteries in all forms of transportation (ground, air, or ocean) must be packaged in a safe and responsible manner. Regulatory concerns from all agencies for safe packaging require that batteries be packaged in a manner that prevents short circuits and be contained in "strong outer packaging" that prevents spillage of contents. All original packaging for Energizer alkaline batteries has been designed to be compliant with these regulatory concerns.

Alkaline batteries (sometimes referred to as "Dry cell" batteries) are not listed as dangerous goods under the ADR European Agreement Concerning the International Carriage of Dangerous Goods by Road, the IMDG International Maritime Dangerous Goods Code, UN Dangerous Good Regulations, IATA Dangerous Goods Regulations, ICAO Technical Instructions and the U.S. hazardous materials regulations (49 CFR). These batteries are not subject to the dangerous goods regulations provided they meet the requirements contained in the following special provisions.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

All Energizer alkaline batteries are packed in such a way to prevent short circuits or the generation dangerous quantities of heat and meet the special provisions listed above. In addition, the IATA Dangerous Goods Regulations and ICAO Technical Instructions require the words “not restricted” and the Special Provision number A123 be provided on the air waybill, when an air waybill is issued.

SECTION 15 - REGULATORY INFORMATION

Batteries marketed by Energizer Battery Manufacturing, Inc. are not classified as dangerous goods by the US Department of Transportation or the major international regulatory bodies and are therefore not regulated.

SARA/TITLE III - As an article, this battery and its contents are not subject to the requirements of the Emergency Planning and Community Right-To-Know Act.

SECTION 16 - OTHER INFORMATION

None.

©2015 Energizer
