**WARNING**
RISK OF ELECTRIC SHOCK. DISCONNECT MAIN POWER AT FUSE OR CIRCUIT BREAKER BEFORE INSTALLING OR SERVICING THE FIXTURE. THE FIXTURE MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODE BY A PERSON FAMILIAR WITH CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED MINIMUM 18" 1/2" supply conductor.

**SAFETY INSTRUCTIONS**
1. Read instructions carefully before attempting to install the fixture.
2. Disconnect power before installing or servicing.
3. This light must be wired in accordance with the local codes and ordinances.

**NOTE**
1. To avoid possibility of electrical shock or fire, the installation personnel must have professional electric knowledge.
2. Please wear gloves to avoid injury before installation.
3. If you noticed any smoke or spark from the wire, please turn off the power immediately and notify relevant personnel.
4. This fixture is applicable in outdoor usage, but the distance from the fixture to the ground should be more than 6.56ft.

**INSTALLATION INSTRUCTIONS**

1. Take out the light and loosen the screws on the cover, then take apart the fixture with a screwdriver. Pull off the quick connect terminal.
2. Drill installation holes at the bottom of the light, paste the EVA mat.
3. Loosen the plug on the bottom plate, then put the wiring through the hole, screw the bottom cover with junction box on the wall.
4. Make wiring connections per “Electrical Connections” section and make sure the wires are well protected.
5. Connect the quick connect terminal, then screw the fixture with the bottom plate.

6. When the lamp is installed, please remove the plug at the drain hole.

### INSTALLATION INSTRUCTIONS II

1. Take out the light and loosen the screws on the cover then take apart the fixture with a screwdriver. Pull off the quick connect terminal. (step 1 from Installation Instructions I)

2. Choose an appropriate connection hole according to your requirements. Loosen the plug, then fit the waterproof connector from the accessories. Rotate the three mounting kits to the proper angle.

3. Put the fixture on the wall, make three marks according to the three mounting kits, then drill three holes for them. Get rubber plugs into the holes, match the three mounting kits to the rubber plugs, then fix the fixture on the wall by screws with the spring washer and plain cushion.

4. After installing the bottom plate, pull the outside wiring into the fixture by the waterproof connector, and tighten the screws on the connector. Make wiring connections per “Electrical Connections” section and make sure the wires are well protected.

5. Connect the quick connect terminal, then screw the fixture with bottom plate.

6. When the lamp is installed, please remove the plug at the drain hole. (step 6 from Installation Instructions I)
