• Read and understand these warnings and instructions before operating the tool.

• Always keep all parts of your body away from the wheel and other moving parts.

• Make sure the wheel is not touching anything when the tool is started.

• Always let the wheel come to a complete stop before setting the tool down.

• Do not operate in combustible environments; sparks could cause a fire or explosion.

• Do not touch or try to stop a moving wheel with your hand.

• Do not apply side pressure to the wheel, such as side grinding, or twisting or wedging the wheel in a cut.

• Do not touch a dry cutting wheel immediately after use, it may be hot.
