Why Use Sustainable Byproducts?

Simply put, to reduce waste and protect our ocean's resources!

By sourcing byproducts from sustainably managed fisheries, we add value to their waste and empower them to compete against those who overfish species, pollute the environment, and damage ocean habitat.

One Of A Kind Salmon Leather Products

Upcycled from a sustainable fishery.

Handmade 100% in the USA.

Each salmon skin is tanned for 3 weeks in our innovative and eco-friendly vegetable based tanning process.

Our one-of-a-kind rugged wallets, belts, and clutches are made with our sustainable wild Alaska Salmon Leather outer, and a durable organic canvas inner.

Chitin and Chitosan made from crustacean shells

We extract and purify chitin, chitosan, and various products out of crustacean shells for the following industries and applications:

- Water Treatment Flocculants
- Beverage Fining Agents
- Pool & Spa Clarifiers
- Food Preservation
- Plant Adjuvants & Nutrients
- Pharmaceuticals & Cosmetics

About Tidal Vision

Tidal Vision is the leading manufacturer in the USA of chitin, chitosan, and aquatic leather.

The team at Tidal Vision is led by Captains Craig Kasberg and Zach Wilkinson.
