

A GUIDE TO DEEP SURFACE WATER DRAINAGE SYSTEM

Polymer is ideal
for swimming pools and
coastal areas affected by salt water

Features + Benefits

- Perfect for low rainfall areas or around swimming pools
- 1 metre lengths easily join together and with other components by simply clicking together
- Black Polymer Grate and Channel made from tough, recycled UV stabilised polymer
- Easy access to remove grates by unclipping at connection points using a flat head screwdriver
- 8 Inch paver-length segments moulded into channel, allowing for easy cutting and rejoining with use of a converter
- Anti-floatation design eliminates the need for rebar

A fully integrated surface water drainage solution for your home
