ABOUT GLASS SINKS

René glass sinks come in an array of shapes, colors, and finishes to ensure that you will find a sink that will truly complement your bathroom décor. They are manufactured using fully tempered glass, which is stronger and can withstand higher temperatures than normal glass. This is a safe option because, if ever damaged, the glass will crumble into granular chunks, rather than jagged shards. Because glass is non-porous, it will not absorb odor or stains. This makes glass a very low-maintenance and sanitary material for a sink.
