

**THIS READY TO USE WINTERIZING FORMULATION IS SAFE FOR USE IN ALL TYPES OF POTABLE WATER & PLUMBING SYSTEMS. ALWAYS FOLLOW OWNER'S MANUAL FOR SPECIAL SERVICE INSTRUCTIONS FOR SYSTEM TO BE WINTERIZED.**

**GENERAL WINTERIZING PROCEDURE:**

1. Turn off fresh water supply.
2. Thoroughly drain water lines at all outlets, closely following manufacturer's directions. If there is a water purifier, remove filter & store separately.
3. Refill systems to capacity with UNDILUTED ANTIFREEZE.
4. Re-pressurize water supply system or turn on demand pump.
5. Open all hot and cold faucets one at a time to confirm that water system is full, fluid will appear pink in color if system is full.
6. Flush toilet several times to ensure drainage. Make sure holding tank is full.

**GENERAL DE-WINTERIZING PROCEDURE:**

1. Open all faucets and run fresh water through system until all color disappears.
2. Flush toilet several times until color disappears.
3. Fill fresh water supply tanks.

**USE UNDILUTED AND AS DIRECTED:**

- Provides Burst Protection to -50°F
  - Safe on Copper, Brass & Plastics (Except Acetate)
  - Provides Superior Corrosion Protection
- Note:** This product is formulated to provide complete protection to -50°F. Some slush may appear at approximately 0°F, but this is not harmful to your water system. As temperature rises, and fluid warms, slush will disappear.
