

ZeroWater Replacement Filter for Pitchers, 8-Pack

- Only Filter Pitcher Certified by NSF to Reduce both Lead and Chromium
- 5-Stage Filtration removes 99.6% of Dissolved Solids
- Fits All ZeroWater Pitchers and Dispensers
- Meets FDA standards for TDS in purified bottled water
- Removes 2x more Dissolved Solids compared to conventional 2-stage filtration

About this item:

ZeroWater is not an ordinary water filter! ZeroWater delivers a unique 5-Stage Ion Exchange technology compared to conventional 2-Stage filtration. Enjoy the purest tasting water with a filter that removes 99.6% of TDS (total dissolved solids) from your tap water, such as Aluminum, Zinc, Nitrate, Fluoride and more! It is the only water filter that meets FDA standards for TDS in purified bottled water. This provides you with a pour-through, gravity fed filter certified by the NSF to reduce Lead and other heavy metals; such as Chromium 3 and 6.

ZeroWater's five stage process:

Stage 1: Coarse filter to remove fine particles/sediment.

Stage 2: Distributor that maximizes contact time.

Stage 3: Multi-layer system using activated carbon and oxidation reduction alloy.

Stage 4: Comprehensive ION EXCHANGE array.

Stage 5: Non-woven membrane to remove fine particles.
