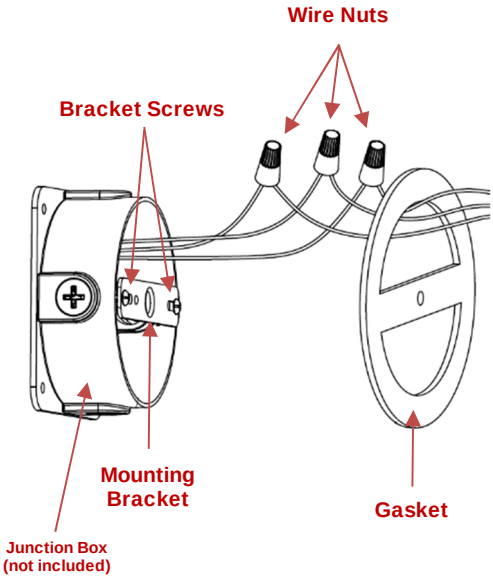
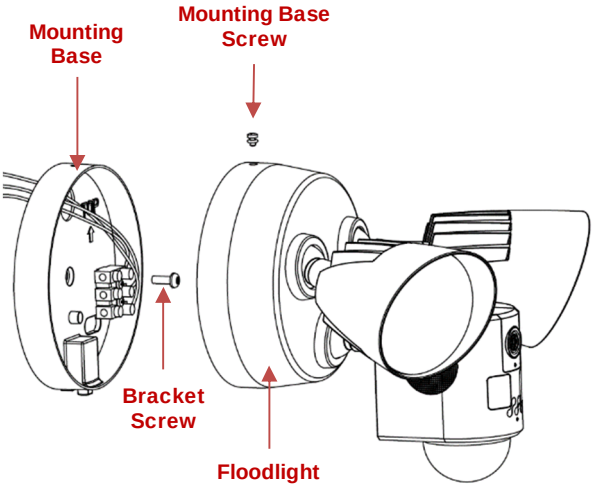
momentum™

Aria

QUICK START GUIDE

Assembly Guide





Mounting Base
Mounting Base Screw
Bracket Screw
Floodlight

What's Included

Aria Floodlight	Gasket	
Mounting Bracket	
Screwdriver	
Wire Nuts (x3)	
#8 Long Bracket Screw	
#10, #8, #6 Short Bracket Screws (x2 each)	 #10 #8 #6

Note: There are three sizes of screws provided. #8 is the most commonly used, however your junction box may use #10 or #6 size screws instead. Make sure to use the screw size that fits your junction box.

Before you Begin

- Shut OFF the power at the fuse or circuit breaker box.
- DO NOT rely on a wall switch alone to turn off the power.
- If you're unsure which switch it is to turn off the floodlight power, please consult with a licensed electrician.
- Make sure your setup location will have strong Wi-Fi reception.
- **WARNING: Failing to shut off the power could result in a serious injury, electrical shock, and/or risk of fire.**

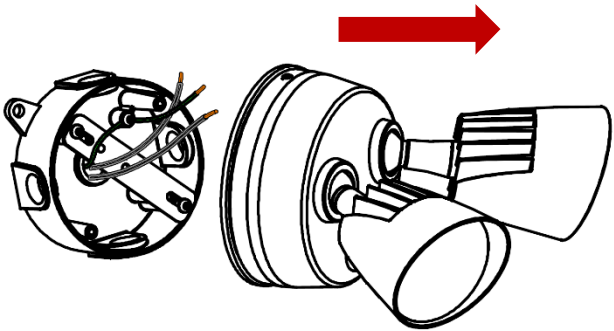
Step 1: Download the app

- Download the **Momentum App** from the Apple App Store or Google Play. You may also scan the QR code above for the direct link to the app.
- Create a new account if you don't have one already.

Important: Make sure the app you download matches the same logo as shown above.

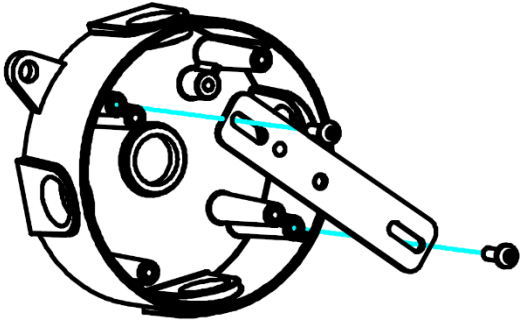
Step 2: Remove your existing floodlight

- Use a screwdriver or another tool to remove your existing floodlight from the junction box.
- Disconnect the three sets of wires from the floodlight.
- If there is a mounting bracket attached to your junction box, you may remove that as well.



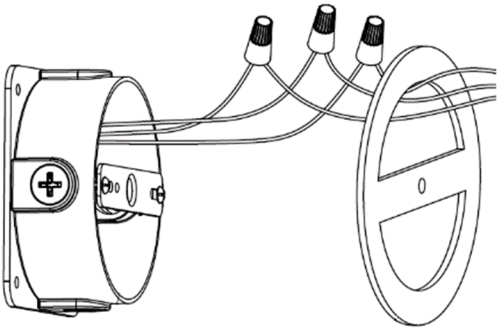
Step 3: Install the bracket and gasket

- Use the provided screws in the box to install the mounting bracket onto your junction box. Make sure it is tight and secure.
- With the provided gasket, peel off the white tape and stick that side around the opening in the wall. **Make sure the center hole lines up with the center bracket hole and that there are no openings around the gasket.**



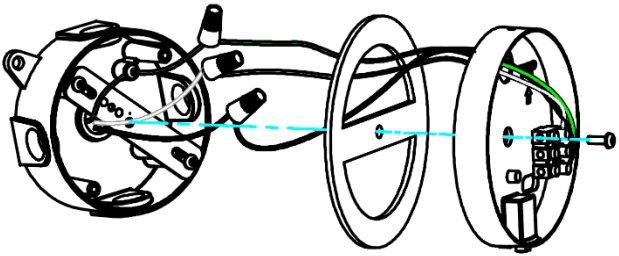
Step 4: Connect the wires

- You should see three sets of wires from both your wall and the Aria mounting base: a ground wire (usually green or copper), black wire, and white wire.
- Use the provided wire nuts to twist the open ends of the matching wires together.



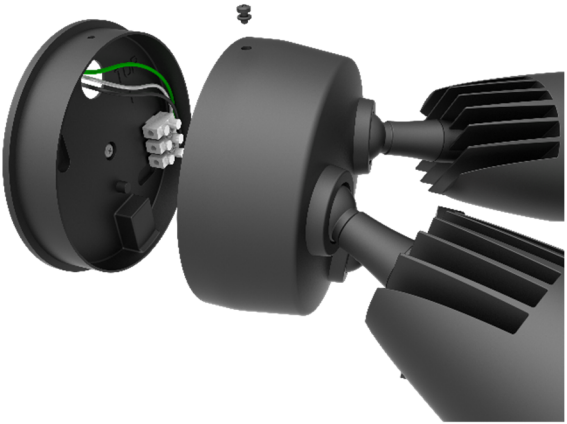
Step 5: Install the mounting base

- First, make sure that the Aria mounting base is set properly.
- With the provided long screw, push the screw through the middle screw-hole of the mounting base. Use the provided screwdriver to tightly secure it.
- Ensure that the gasket and base is tight and does not move.



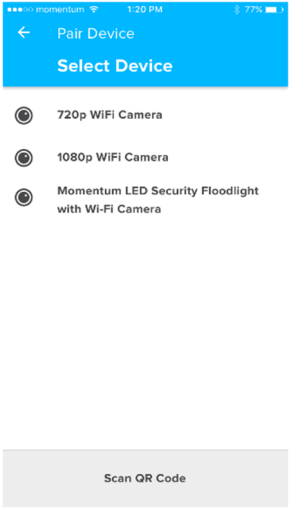
Step 6: Mount the Aria floodlight

- The floodlight can now be mounted onto the mounting base. Make sure the screw-hole at the top matches on both the mounting plate and the floodlight, then use the provided screw and screwdriver to screw them tightly in place.



Step 8: Pair the Aria

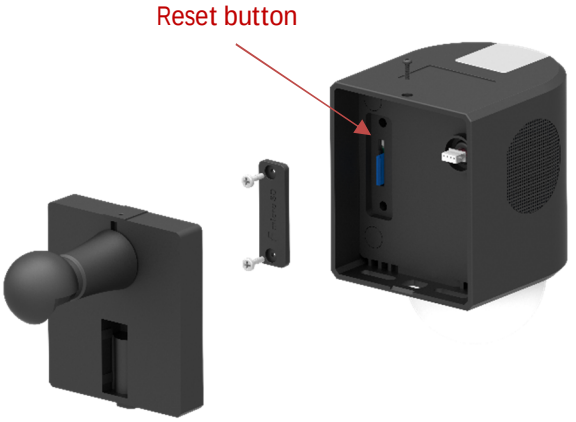
- Turn on the power from the power breaker. Once the power is back on, a sound will play from the Aria notifying you that it's ready to pair.
- Go back into the Momentum app and follow the in-app screens to complete the pairing process.



Quick tips

Reset

1. To perform a factory reset, you must **open the camera and hold its internal reset button for 10 seconds**.
2. If you want to pair the Aria to a different Wi-Fi network, **hold the reset button for 3 seconds** and redo the pairing process again.



Quick tips

Light Indicators & Status

1. **Solid Red** – Booting
2. **Blinking Red** – Failed to connect to Wi-Fi
3. **Double Blinking Blue** – Ready to connect to Wi-Fi
4. **Blinking Blue** – Aria is connected to Wi-Fi
5. **Solid Blue** – User is live streaming
