

VIRTU USA

Cleaning and Care Instructions

Virtu USA vanities are treated with several types of sealants to protect against moisture and humidity in the bathroom environment. To ensure durability for years to come, please follow our cleaning and caring instructions. Wood surfaces should be cleaned with wood care products such as soapy water or Pledge. The wood surfaces should only come in direct contact with a soft cloth and never with any coarse materials that may scratch and discolor the surface. Continuous and prolonged exposure to moisture may damage or discolor the wood. Wiping the surfaces dry after each use is highly recommended to maintain the natural beauty of the product. Please avoid using products that contain bleach or ammonia. Damages due to improper care and cleaning will void the warranty and may result in a refusal for return or exchange. Counter/Vanity Top Surfaces: Recommended to clean your countertops daily with a soft cloth or paper towel and a residue free cleaner designated safe for natural stone. Don't overuse recommended amounts of any cleaning product, too much may leave a film, causing streaks.
