

Flexible Duct Installation

Recommended Uses

- Flexible duct is designed for low to medium operating pressures in HVAC systems.
- Designed for use as a non-insulated supply or return air duct venting systems.
- **WARNING:** Foil duct not for use to vent appliances for cooking, heating, and clothes drying unless recommended by the dryer manufacture and meets UL certification for said use.
- **WARNING:** Vinyl hose not approved for dryer installations.

Directions For Use

- Make sure there is enough clearance in order to install hoses and duct without kinking.
- Bend clearance is the diameter of the hose times 2; i.e. 3" hose has a 6" bend clearance requirement, a 4" hose has an 8" bend clearance requirement.
NOTE: Use a close elbow if needed to make a sharp turn (sold separately).
- Secure with hose clamps on each end (sold separately).
