

Douglas Fir Lumber

PRODUCT VERSATILITY

Ideal for a Wide Range of Uses

Douglas Fir Lumber

Douglas fir is a strong and durable species. Douglas fir lumber is dried in state-of-the-art kilns while maintaining the strength, straightness and versatility of the species.

Product Versatility Across Grades

- Premium grade is an attractive lumber product with a bright, clean appearance and #2 knot size. It's perfect for high-quality dealers and DIY markets.
- #2&Btr is a consistently straight, clean and attractive lumber. It's ideal for discerning dealers and builders.

Consistent and Reliable

- Computerized manufacturing and grading systems are calibrated to produce straight lumber with a consistent appearance: day-to-day, month-to-month, mill-to-mill.
- Packages are wrapped to ensure lumber arrives clean and bright.
- Douglas Fir is available in sizes 2x4, 2x6, 2x12, and 4x6.
