

NOT JUST A PRODUCT...A SOLUTION. EKENAMILLWORK.COM

Whether you're working with indoor or outdoor applications, crossheads are an excellent design improvement to the outer casings of doorways and windows. Manufactured from high density polyurethane, our crossheads carry a limited lifetime warranty against rotting, splitting, or cracking. Our crossheads can be trimmed with standard woodworking tools and installed using construction adhesive.

Tools & Materials Needed

- Caulking gun
- Elastomeric adhesive caulk
- Tape measure
- Sponge or clean cloth
- Putty knife
- Extra fine sandpaper
- Hammer
- Corrosion-resistant finishing nails or screws
- Jigsaw, keyhole saw, or pen-knife
- Pencil
- Handsaw

Prior to Installation

- It is highly recommended that you paint/finish our crossheads before you install them. Once installed, you can apply any necessary touch-up paint/finish.
- Clean installation surface and back of crosshead of all dirt and dust with a clean cloth or sponge.
- Make sure that the surface and the back of the crosshead are completely dry before attempting installation.

Important Safety Instructions

- Make sure to use the correct tools recommended.
- Wear safety goggles.
- Follow fixture, power tools, and paint manufacturers' instructions and users manuals.
- Use common sense and follow good construction practices.

Installation Process

1. Place the crosshead on top of the entrance opening.
2. Align crosshead with the outer edges of the opening or pilasters. (Note: The crosshead can be slightly larger than the opening as long as the overhang is equal on both sides.)
3. Fasten the crosshead using PL Premium Construction Adhesive and any necessary fasteners.
