

PURE GARDEN

PATIO AND GARDEN ESSENTIALS

Weighted Base for Offset Cantilever Umbrella Instruction Manual

1. Sturdy 4 square base construction weighs up to 200 lbs. when filled with sand and weighs up to 150 lbs. when filled with water. Fill the 4 bases with sand or water then position them around the Umbrella pole, and on top of lips of the umbrella cross bar- stand (see photos below).
2. Easy to clean, store and fill spout
3. Designed only for umbrellas that have a cross bar stand as a base. Does not work with umbrellas that are just a pole with no cross-bar base.
4. Filled base will provide weight to keep umbrella straight even in windy conditions. However, for safety keep Patio Umbrella closed when not in use and close the umbrella in high winds or storms.

How to position the 4 square bases on the umbrella cross-bar after filling with sand or water:
