

AIR COMPRESSOR QUICK START UP GUIDE

Model: C302H
SKU: 1001655406

START

1

Product is shipped with oil in the crank case. Ensure that the oil level meets the center of the red dot in the oil sight glass. Consult your manual for oil fill instructions.

2

Ensure the switch is in the OFF (0) position

3

Pull the ring on the safety valve to release air for about 20 seconds (if any). Release the ring to close.

4

Close regulator knob by turning in a counterclockwise direction until the outlet pressure reaches zero

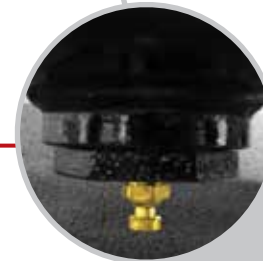

5

Attach air hose to the quick coupler (air hose and accessories NOT included)

6

Close the drain valve by turning in a clockwise direction. Drain tank after every use.

7

Plug in the power cord. Use of an extension cord is not recommended with this product. Please use a longer hose instead.

8

Turn the switch to the AUTO (I) position. After starting, wait until the compressor shuts off before using.

9

Adjust the pressure regulator by turning in a clockwise direction to the working pressure of the tool.
