

Use and Care Instructions

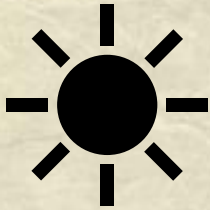

Monstera (Philodendron Monstera)

The Philodendron Monstera is an eye catching and easy to care for plant. One of the most noticeable characteristics of the Monstera is its glossy heart shaped like leaves, which split from the leaf edge to the center as the plant matures. The Monstera needs medium to bright light and it can adapt well under lower light conditions. Water your Philodendron Monstera well until the water drains from the bottom of the drip holes and allow the top of the soil to dry before watering again.
