- Cut off both ends of the hose leaving approximately 4" from the end of the couplings
- Include a copy of the receipt, a description of the defect along with the original packaging
- Include a physical return address (we cannot ship to PO Boxes)
- Send to :
Customer Service Department
Flexon Industries Corp.
One Flexon Plaza, Newark, NJ 07114

Postage paid by sender for replacement. Should you have any further questions please visit: flexonhose.com/warranty or call 1-800-327-4673.

WARNING: DO NOT DRINK FROM THIS HOSE.

Garden hoses can come in contact with harmful chemicals sometimes used with nozzles, garden sprayers or chemicals used on lawns. The inside of the hose is dark, damp and warm, causing bacteria to form. It is recommended that you run water through the hose until the water is cool before use.

WARNING: Do not spray water into an electrical outlet. Severe electrical shock could result.

IMPORTANT: This hose is intended for normal usage as specified on the front of this label. Do not leave hose under pressure when not in use. Place washer firmly into coupling at faucet end to ensure a tight seal. Drain your hose in the summer when you are not using it and keep it shaded as much as possible. Water left in a hose in the sun will expand, damaging the hose. Protect your hose from harsh winter weather by storing it indoors. Be sure to drain the hose completely before storage as water remaining in the hose can freeze, damaging hose.
