

70-198

SVS™ Silicone Vapor Shield™

SPECIFICATIONS

ITEM NO.	70-198
COVERAGE	200 sq. ft.
DIMENSIONS	33.5 in. x 72 ft.

MOISTURE SHIELD

Reduces vapor flow without trapping moisture

LESS MESS

Helps reduce dust and noise levels, clean to use

EASY FLOORING INSTALLATIONS

Recommended for staple and nail down installations of solid and engineered wood floors

	SVS™	Red Rosin Paper	Asphalt Paper
Meets perm ratings recommended by the National Wood Flooring Association	✓	-	Some brands
Clean to use, no rub-off on walls and hands	✓	-	-
Ok to use with radiant heat systems - No asphalt odor	✓	✓	-
100% Recycled	✓	-	-

Silicone Vapor Shield is a moisture barrier underlayment made of 6 mil. wet strength paper with a backed silicone coating that will not allow moisture to penetrate through to the wood flooring planks.

Since SVS is made with silicone, the smooth surface allows installers to slide wood planks easily during installation plus it does not contain any toxic tar or tar-based ingredients found in some underlayments. Silicone Vapor Shield is made from repurposed paper that is environmentally safe and made of 100% recycled contents. The SVS is a white paper that allows a more visible chalk line and doesn't leave a black residue on hands or walls and will not fall apart during installation like red rosin, Kraft paper or wax papers do.

SVS meets the recommended perm rating guidelines as set forth by the NWFA and is suitable for use on radiant heated floors.

Quality & Excellence Since 1938.
