Note: Cushions may be tucked underneath modules

2

Determine desired layout configuration

3

Insert 2 furniture clip underneath to secure adjoining module.

4

Insert anti-slip liner in between cushion and wicker.
Velcro back cushion to seat cushion.

Cleaning and Care Tips

- Outdoor environment is subject to extreme UV rays, debris, bird droppings, tree sap, etc. When not in use, it is highly recommended to protect your new outdoor furniture set with an all-weather waterproof furniture cover, now available from our online store.
- Keep table away from direct sunlight or cover glass when not in use. Glass may intensify heat and UV rays, and may damage wicker material during prolonged exposure.
- Keep cushions looking new longer by applying a layer of outdoor fabric protectant spray regularly. This will help strengthen water repellency, increase stain resistance, and minimize color fading.
- Cushion covers are removable and washable. We recommend hand washing or machine wash on gentle cycle in cold water with mild detergent. Lay flat or hang dry.
