

Van Zyverden's
CONTAINER LILIES ORANGE PIXIE

Lilies are one of the truly great garden plants, and they are beloved by gardeners everywhere. Their beauty, diversity, extended season of bloom, graceful stature and overall reliable disposition reflect the fruits of hundreds of years of selective breeding. In Chinese, the word "Lily" means "forever in love". The Liliaceae family is so large, varied, and complex that it is challenging to describe them in short. Lilies are deer and critter resistant. Plant them just about anywhere - borders, beds, cutting gardens, perennial gardens, pots and containers.

Sun lover

*Lower grower
than most lilies*

Good container choice

About This Variety: Due to their imited height, Pixie lilies are a good choice for smaller pots. They are easy and fun to grow. Orange is the most popular lily color.

Growing Instructions: Plant in well-drained soil where they will receive 6-8 hours of sun a day. They are winter hardy and considered a strong perennial that can be left in the ground and will re-bloom year after year if the conditions are right. Lilies perform best when well mulched.

Care Tip: Lilies prefer cool soil, which argues for shade at their feet from low growing companions. When cutting the flowers for bouquets, remove no more than 1/3 of the stem so sufficient leaves remain to renew the bulb for the coming year.

Exposure: Full sun to partial shade

Height: Grows 12-18"

Spacing: Plant 6-8" apart, 6-8" deep

Hardy in: USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
