

Johnson's R&D facility in Osaka, Japan has developed massage chairs based on closely simulating Japanese massage techniques. When combined with the multi-point body scanning technology, Johnson massage chairs detect every curve of the back. Through use of our innovative Two Head - 4D Massage mechanism and LLDPE Air chambers, they deliver a customized massage experience to soothe and loosen tired, stressed muscles while improving overall health and well-being.

Faster Workout Relief  
Better Back Health  
Deep Relaxation  
True Stress Reduction  
Overall Peace of Mind

## the J6800

A state of the art 4D massage chair featuring components and technologies that set a new standard in the massage chair world.

- Johnson 4D-2 head mechanism delivers unique 4D realistic massage motions that gently ease tense muscles
- Multi-point body scan customizes the massage experience to the contours of your neck, shoulders and back
- Pulse Air Massage system stimulates muscle fibers and enhances circulation
- Heat sources located in soles of feet further loosen tense muscles
- Adjustable footrest extends an additional 6" to accommodate taller users
- Intuitive controller changes massage courses and settings "on the fly" for uninterrupted therapy
- Controller with two memory settings saves your favorite massage programs
- 9 Automatic Massage Courses and 35 Massage Techniques give you a variety of massage experience options
- Repeat Button allows you to have the massage program repeat a massage movement that hits the right spot

## the J5600

The perfect 3D massage chair for those who desire many of the same state of the art massage capabilities of some of the other Johnson chairs, but prefer a sleeker more compact design at a competitive price.

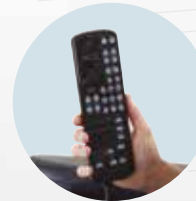

- Johnson 4D-2 head mechanism delivers unique 4D realistic massage motions that gently ease tense muscles
- Multi-point body scan customizes the massage experience to the contours of your neck, shoulders and back
- Multi-functional footrest can be used as a traditional foot and calf massage mechanism or flipped to become an ottoman
- Armrest position automatically adjusts in conjunction with recline of the chair back to ensure full contact with all massage surfaces
- Shortcut Keys at your fingertips allows adjustment to key elements of massage from any reclined or upright position
- Built in surround sound speakers with audio input
- "Music" massage program synchronizes the massage experience to your music choice
- Heated footrest and unique upper body heating feature further loosen tense muscles
- Pulse Air Massage system stimulates muscle fibers and enhances circulation
- 11 Automatic Massage Courses and 46 Massage Techniques
