Frequently Asked Questions – Reclaimed Pallet Boards

Do all the boards in a pack look the same?

Within a single pack of Dimensions Reclaimed Pallet Boards, there may be any number of aesthetic variations, such as species, colors, grain patterns, number of knots, nail holes, mortise holes and precise dimensions. However, there will be no greater than ¼" variation between boards within a single pack. This mixed offering guarantees each project will be characterized by its own fun and unique personality.

Are all the boards the same color?

Board colors vary naturally by species, but also may vary in color, staining and more. These variations are often determined by each board's original use during its life as a pallet.

Are all the boards the same size?

The precise dimensions may vary by a 1/4" or so, but each pack is hand selected to include generally like-sized boards.

Will I need to be careful when handling boards to avoid splinters or exposed fasteners?

You should always use care when handling any wood products. However, all fasteners are clipped for a smoother texture, and our boards are sanded to minimize rough surfaces and imperfections.

Are these boards VOC-free?

Yes. At the time of this writing, Dimensions Reclaimed Pallet Boards are the only brand of pallet wood on the market that's VOC- and heavy metal-free – unlike a majority of other salvaged pallet boards available for purchase. Our boards are rigorously inspected for mold and insect damage, as well as scanned by a handheld detector for hazardous VOC chemicals. They are then run through an XRF scanner to detect any heavy metals such as Arsenic and Cadmium. These stringent testing protocols are in place to ensure that your pallet board projects are as good for your health as they are enjoyable to make and use.

Will the boards arrive ready for use?

Yes, our pallet wood comes unassembled, clean, dry and sanded. Cut the bundle loose and off you go!

What are some ways to use Reclaimed Pallet Boards?

In our opinion, anywhere and everywhere! Indoors and out, on walls and ceilings, in the

creation of décor accents and wall art, to build headboards and furniture ... truly wherever your imagination takes you.

What are some helpful tips or suggestions?

For ceiling applications, in addition to the fasteners of your choice (nails or screws), construction adhesive is recommended. As well, if your pallet boards are going outdoors in a non-weather-protected area, the use of a sealant will keep your project looking great much, much longer.

How do I calculate how many bundles will my project require?

Multiply the length of the surface you wish to cover (in feet) by the height of the area you wish to cover (in feet) to calculate the square footage. For example, a 3-foot wide by 10-foot tall area is 30 square ft., so you would need three of our 10-sq.ft. packs. Each of our available bundles covers approximately 10 square feet *with the exception of the 1" x 4" x 24" 6-pack*. That bundle covers approximately 4 square feet. However, always remember to have extra boards on hand to accommodate any surprises and for the greatest variety of boards to choose from.

Do these boards originate from pallets that were sustainably sourced?

Indeed. Dimensions Reclaimed Pallet Boards are both domestically and sustainably sourced.
