

INSTALLATION INSTRUCTIONS FOR FIXTURE 6963

**WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.
AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DU DISJONCTEUR.**

MOUNTING THE FIXTURE

1. Shut off the power at the fuse box or circuit breaker box. If necessary, remove the old fixture from wall including the mounting hardware.
2. Carefully remove the new fixture from the carton and check that all parts are included as shown in the illustration.
3. Thread the nipple (C) onto the mounting strap (A).
4. Place the washer (F) over the nipple protruding through the mounting strap and thread lock nut (E) tightly onto nipple (C).
5. Attach the mounting strap (A) to the outlet box using the outlet box screws (B). The side of the mounting plate marked "GND" must face out.
6. Follow the wiring instructions carefully (See Fig.2).
7. Attach the fixture back plate (L) over the mounting strap (A) allowing the nipple (C) to protrude through the center hole of the back plate (L). Then secure with hex nut (M) and finial (K).
8. Place the glass shade (I) and cushion ring (H) over the socket (J) and secure with socket ring (G).
9. Install the bulbs in accordance with fixture's specifications. **(DO NOT EXCEED THE MAXIMUM WATTAGE RATING!) (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!).**

CONNECTING THE WIRES (See fig. 2)

1. At this point, connect the electrical wires as shown in Fig. 2, making sure that all wire connectors are secured. If your outlet box has a ground wire (green or bare copper), connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the mounting strap using the green screw provided.
2. Tuck the wire connections neatly into the wall junction box.

Your installation is now complete. Return power to the junction box and test the fixture.
