US DOT, All batteries are not subject to the requirements of the Department of Transportation (DOT) subchapter C, Hazardous Material Regulations since each battery meets the exceptions under 173.185 (b). The batteries are exempted from the US DOT regulations as long as they are separated to prevent short circuits and packed in strong packing for conditions normally encountered in transportation.

ICAO and IATA, IMDG all batteries are regulated as Hazardous Material by the International Civil Aviation Organization (ICAO), the International Air Transport Association (IATA) and International Maritime Dangerous Goods Regulations (IMDG). The only DOT requirement for shipping these batteries is special provision 130 which states: "Batteries, dry are not subject. They must be transported according to Section 38.3 of the Fifth Revised of the Recommendations on the transport of Dangerous Goods and Drop test of SectionII of Packing Instructions 968~970 of 55th DGR Manual of IATA .The lithium cell(CR2025)has passed the test UN38.3,according to the report ID:RZUN2013-1464.
