Care and Cleaning

Recommended Care and Cleaning of all rugs:

Nourison recommends only the use of Woolite or other compatible Carpet Cleaner for the cleaning of all rugs. The cleaning process should involve applying the Woolite with a soft bristle brush, rinsing the water, and extracting with a vacuum or extractor. The rug should then be dried by air or low temperature hair dryer. The use of any other cleaning solvent will void the Nourison warranty, and make the cleaning service solely responsible for any damage caused to the rug. Nourison does not guarantee that these methods work and should be used as a guideline only! If in doubt, call a reputable cleaner.

Vomit	Detergent/White vinegar or cleaning fluid
Wax	Cleaning fluid or scrape and vacuum
Wine	Detergent/White vinegar or cleaning fluid

^{*}If recommended procedure is not effective call a reputable cleaner. Some stains are so complex that someone with knowledge of textile chemistry should treat them. Don't wait for annual cleaning. It may be too late to remove the stain.

Note: Almost all spills are removed by either dry cleaning fluid (follow manufacturer's instructions) or a simple solution of one teaspoon of mild detergent with one teaspoon of white vinegar in a quart of warm water.
