PLEASE READ OWNER'S MANUAL COMPLETELY
BEFORE ASSEMBLING YOUR GATE FRAME.

For use with Linden Professional Fencing

This kit can be used to make a custom-size Linden gate
The Linden kits and pre-built panels are sold separately

Thank you for choosing the Barrette Outdoor Living Fence Gate Frame. Please read the instructions completely before assembling your gate frame. Retain manual and your dated sales slip for future reference and warranty claims.

Before You Begin...

Check your local zoning laws.

- Local zoning laws and Home Owners Associations may regulate the location, style and height of your fence or even require a permit signoff beforehand.

Contact your local utilities companies.

- You must have the utility companies clearly mark your property for electrical, gas or water lines to avoid puncturing any unseen underground utilities.

Pay to mark your property line.

- Being proactive will save you time and money from any disputes from neighbors.

Gate posts require an internal support system for weight-bearing purposes and therefore wooden inserts or a post stiffener is required.

Post Spacing will be determined by gate width and hardware.

Installation

- 1.) For use with Linden pre-built fence panels or kits (sold separately) (Figure 1).
- 2.) Use the chart provided to determine the gate width (Figure 2).
- 3.) Remove the boards from the pre-assembled panel or determine the number of boards from the kit version. Cut the rails to the designated width (Figure 2).
- 4.) Assemble the boards into the bottom rail starting left to right and place side channels on either ends of the panel.
- 5.) Attach the boards to the top rail, working left to right. Leave 3-5/8" on each side of rails to allow for connection into uprights.
- 6.) Install the assembled panel into the gate uprights.
- 7.) Next adhere the internal post top with glue (Figure 3)
- 8.) Make sure the gate is square (Figure 4) and mark the screw position in each of the four corners. The screws must connect the rail to the upright (Figure 5).
- 9.) Secure the rails to the uprights using #2 square drive bit with supplied screws (20). Repeat in each of the four corners on the front side.
- 10.) Mount the gate according to the hinge instructions.
