

DO IT ONCE. DO IT RIGHT.™

T-STAR plus DRIVE WAFER HEAD HCR-X™ COATING

ENGINEERED FOR USE IN MULTIPLE MATERIALS AND EXTERIOR APPLICATIONS, INCLUDING TREATED LUMBER.

- Low-profile head design is ideal for exterior furniture and planter boxes
- Wider head design offers increased surface area for draw down where flush or countersunk installation is not necessary or desired
- Available in exclusive SPAX HCR-X™ Coating for use in treated lumber* and exterior, coastal environments (Condition 4)

*Not for use with redwood or cedar

The unique low-profile wafer head is an ideal alternative to flat truss head screws for attaching fixtures and brackets that require a larger surface area for greater hold-down force. T-STAR plus drive provides superior bit engagement and virtually eliminates camming out.

New SPAX HCR-X™ Coating System offers superior "X-terior" corrosion resistance when installed in treated lumber and tested in exterior, coastal construction environments.

(Testing was performed utilizing code-recognized acceptance criteria.)

Patented thread serrations and unique 4CUT™ Point require no pre-drilling, speed installation and help guard against wood splitting.

SPAX Multi-Purpose Exterior Wafer Head Screws are available in a wide selection of sizes and are sold in project-appropriate 1 lb. and 5 lb. package quantities.

#8 x 1-1/4"
#8 x 1-1/2"
#8 x 2"
#8 x 2-1/2"

#10 x 2-1/2"
#10 x 3"
