

EXTERIOR ELASTOMERIC MASONRY, STUCCO & BRICK PAINT
NO. 68 WHITE

PRODUCT INFORMATION

BEHR PREMIUM® Elastomeric Masonry, Stucco & Brick Paint is a flexible, high-build coating designed to expand and contract, bridging hairline cracks in exterior, vertical masonry surfaces. This waterproofing coating is extremely durable and is mildew and dirt resistant. It has superior elasticity and elongation properties, stretching up to 600%. This 100% acrylic latex formula provides a breathable film, releasing moisture vapor that builds in walls. This low-sheen paint has excellent color retention and is available in 55 custom tinted colors.

RECOMMENDED USES:

This product is ideal for use on properly prepared and primed vertical surfaces such as:

- Concrete Tilt-Up
- Concrete Block/CMU
- Cement Board Siding
- Brick
- Stucco
- EIFS

Full Cure: 2 weeks

SURFACE PREPARATION:

All surfaces must be clean, free of dust, chalk, oil, grease, wax, polish, mold and mildew stains, loose and peeling paint, rust, and all other foreign substances.

Stainblocking: After priming, test for stain bleedthrough by applying the topcoat to a small section. If the stain bleeds through the topcoat, apply a second coat of primer and test again before top-coating the entire area. If bleeding continues, a longer dry time of the primer may be needed before top-coating.

Masonry: All masonry surfaces must be cured at least 30 days before painting. The pH must be 10.0 or lower prior to coating. Smooth masonry may require an adequate profile for adhesion. For all other smooth concrete, create a profile using a product such as a muriatic acid etcher to achieve a textured profile. Use a cleaner to remove loose aggregate and debris.

WARNING! If you scrape, sand or remove old paint, you may release lead dust. **LEAD IS TOXIC.** Contact the National Lead Information Center at 1-800-424-LEAD or visit www.epa.gov/lead.
