

GENERAL INSTALLATION INSTRUCTION

LATITUDE 2 DECORATOR MIRROR

PREPARATION

Tools Required for Assembly: (not included)

- Pencil
- Philips head screwdriver
- Level
- Hammer
- Electrical drill with 5/16 in. drill bit
- Tape measure
- Safety glasses
- Hammer

▲ Caution: Molly bolts are for dry walls only. Use tile anchors for tile surfaces. (not included)

▲ Caution: Two people are required to safely install this mirror. The mirror will break if dropped. Take extra precautionary measures to ensure a secure grip on the parts.

INSTALLATION INSTRUCTION

1. Once the location of the mirror has been determined, mark the positioning of the four mounting studs and their screw holes with a pencil. Use a measuring tape and a level for accuracy. (Fig. 1)

2. Drill 5/16 in. pilot holes into the wall where the Molly bolts will be inserted using an electrical drill.

3. Tap Molly bolts (A) into the pilot holes using a hammer.

4. Use an electrical screwdriver to tighten the screws. This will collapse the Molly bolts (A) tightly to the wall. (Fig. 2)

5. Unscrew the screws (a) from the Molly bolts (A). Molly bolts will remain in the wall. (Fig. 3)

6. Place the stud (B) over the Molly bolts. Insert the screws (a) back through the bracket and the Molly bolts, and then tighten firmly with Philips head screwdriver. (Fig. 4)

7. Secure the two lower mirror brackets (C) to the wall. First, place the mirror bracket's base (c1) on the stud (B) and then place the cylinder-shape part (c2) on the base. (Fig. 5)

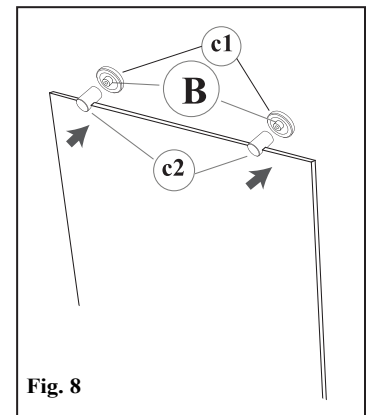

8. Tighten the set screws (D) with Allen wrench (E). Make sure that the opening of the groove is facing up. (Fig. 6)

9. Rest the mirror (F) on the lower mirror brackets (C). (Fig. 7)

10. Place the two upper bracket bases (c1) on the studs (B) and position the two upper cylinder-shaped bracket parts (c2) on the top edge of the mirror. Align the respective bracket parts (c1 and c2) over the stud (B). (Fig. 8)

11. Tighten the set screws (D) with Allen wrench (E). (Fig. 9)

12. Tighten the set screws (G) in each of the four mirror brackets with Philips head screwdriver. Tighten until just snug – do not over tighten. (Fig. 10)

CARE AND MAINTENANCE

To maintain the beautiful luster finish, please use soft damp cloths when cleaning and never use any cleaning solvents.
