STRETCH & SEAL®
Instructions for Use

Step 1:
Peel away clear cellophane release liner.

Step 2:
Press tape firmly on object to be wrapped, hold in place and STRETCH as you begin to wrap the tape once completely over itself.

Step 3:
While holding the tape in place, stretch to 2 to 3 times its length and wrap object with a 2/3 overlap. This will ensure a tight seal.

Step 4:
To complete the repair, wrap tape completely over the previous layer and press firmly.
