

Grower's Phalaenopsis Orchid in 5 in plastic pot

- **Container:** Phalaenopsis will come in a plastic grower's pot wrapped with a burlap cover. The burlap can be used to attach the orchid to a tree if desired. If customer chooses to grow the orchid in the plastic pot, the burlap cover can remain on plant or can be discarded.
- **Lighting:** bright light is best
- **Water:** Weekly watering will be required. It is best to drench once a week. Be sure to allow water to drain out completely. Avoid standing water. Select a day of the week and always water on that same day to prevent over watering.
- **Temperature:** If you live in a place where the weather changes to temperatures below 50 degrees Fahrenheit, do not allow the plant to attach to the tree. Simply place it in a well-lit area of a covered porch or patio. You will need to bring the plant inside to prevent cold exposure during temperatures below 50 degrees.
- **Fertilizer:** Water Soluble 20-10-20 is best
