SAVE THESE INSTRUCTIONS

Connecting Interchangeable Heads

1. Press down the release button (Fig. 1).

2. Install tool attachment (tool head) on the SUN JOE Handler.

- The release button (located in the handle) must be held down while installing the attachment.
- The flats on the Handler tip must be aligned with the flats on the attachment socket in order for the Handler to be fully engaged and work properly (Fig. 2).

- To align the flats, simply twist the attachment while installing. The attachment will bottom out on the handle when the flats are properly aligned and prevent the attachment from rotating (Fig. 3).

⚠ CAUTION! Do not push the release button while using the SUN JOE Handler. Doing so could cause the attachment to become disconnected and serious injury could result.

SUN JOE Handler Care

1. For optimal performance it is important to keep the locking tip and attachments free of dirt and debris.

Locking Tip: Rinse the locking tip with water. **DO NOT PUSH THE RELEASE BUTTON.** Doing so could result in debris getting into the ball joints impeding the performance of the locking tip mechanism.

Attachments: To remove debris, rinse attachments with water.

Removing Interchangeable Heads

1. Press down the release button (located in the handle) (Fig. 4).

NOTE: The locking mechanism is designed to be engaged at all times and is only deactivated when the release button is pressed.

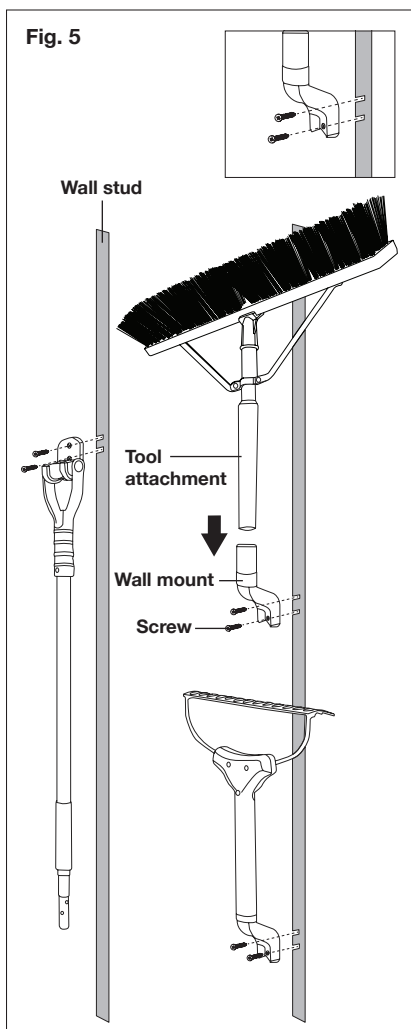

2. Grasp tool attachment firmly, and remove (Fig. 4).

NOTE: The release button must be held down while removing the attachment.

Wall Mount Assembly

1. Remove the wall mounts and screw pack from the packaging and locate stud on the wall.
2. Position wall mounts on stud as shown. Drill screws into stud. Be sure to allow enough space between the mounts to insure that the head attachments will not interfere with each other (Fig. 5).
3. Insert attachments into mounts (Fig. 5).

⚠ WARNING! Some dust and debris created by the use of the tool could contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Some examples of these chemicals are:

- chemicals in fertilizers
- compounds in insecticides, herbicides, and pesticides
- arsenic and chromium from chemically treated lumber

Your risk from exposure to these chemicals varies, and depends on how often you do this type of work. To reduce your exposure, work in a well-ventilated area and with approved safety equipment, such as dust masks that are specially designed to filter out microscopic particles.
