

Thank you for ordering our **BLOOMAKER**. Amaryllis Paris Kit and bulb!

Place the pumice stones in the bottom of the vase then place the amaryllis bulb on top of them.

Lightly shake the vase so the amaryllis bulb sinks slightly into the pumice stones and 1/4 to 1/2 of the bulb is covered by stones. Place the moss and pine cones on top of the pumice stones.

Add and maintain 1-2 ounces of water in the pumice stones. The amaryllis bulb does not need be touching the water. The humidity from the water in the stones will supply ample water for the bulb to thrive

When the blossoms are spent, cut them off to allow additional flowers to emerge.

For best results, keep your Amaryllis Vase Kit and bulb away from direct light and drafts.
