IMPROVED**

WIRELESS DRIVEWAY ALARM

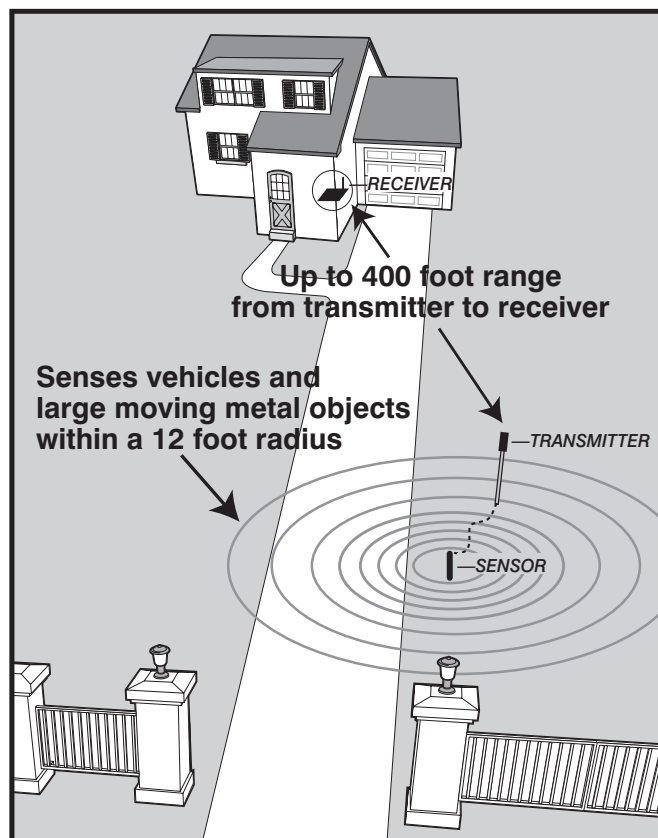

Provides driveway monitoring
for home, property or workplace.

STANDARD FEATURES

- Electromagnetic technology detects vehicles entering and exiting driveway and alerts you with an indoor chime.
- Up to 400' range from indoor receiver to driveway sensor/transmitter.
- Does not detect people or animals, eliminating false signals.
- Transmitter requires 2 "AA" batteries (not included). *Lithium alkaline AA batteries are recommended for extreme climates (hot or cold).*
- Ideal for monitoring parked boats, RVs, motorcycles, etc.
- 12 Month Warranty.

New Advanced Detection Design...

- features *Sensitivity Adjustment* (3'–12' radius) that reduces false signals caused by neighboring traffic.
- eliminates false signals due to extreme changes in temperature.
- includes adjustable dip switches for "cross talk" protection.
- professional grade in-ground electromagnetic sensor detection technology.
